

3+ Tables

In our collection we offer chairs, tables, shelving, but we don't want to categorise them as office or dining

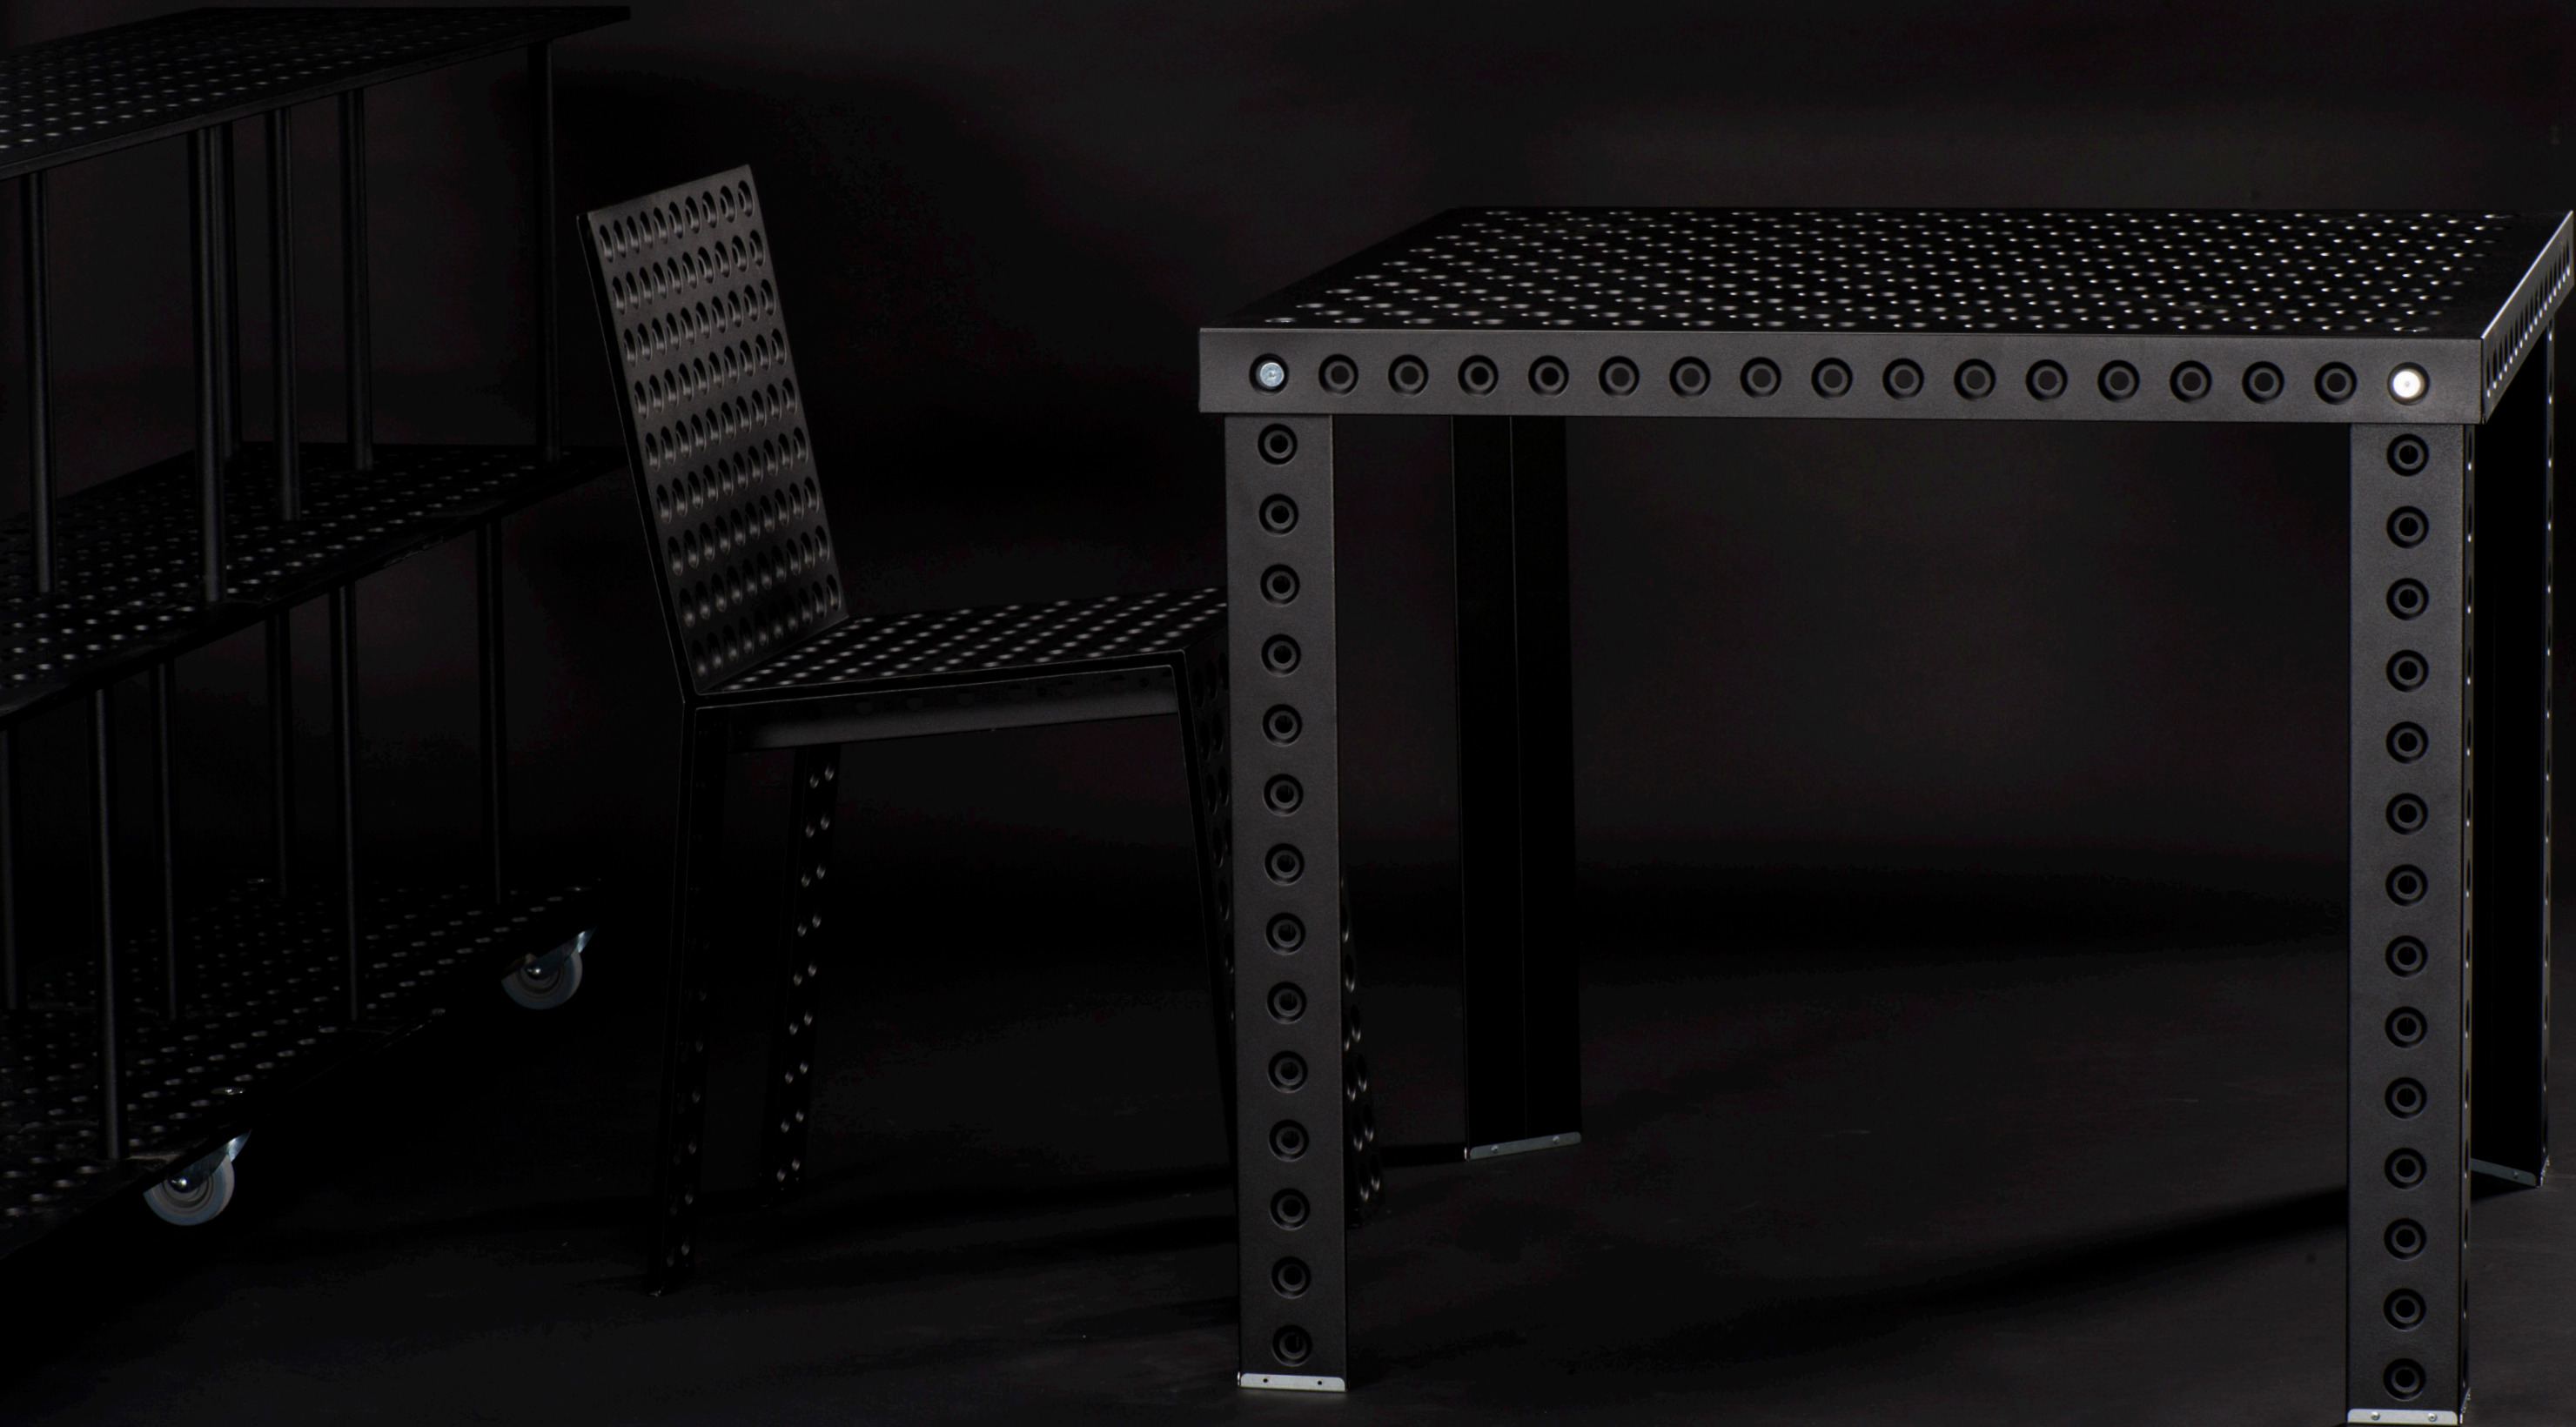

Project 3+ embodies an innovative technology of metal-sheet stabilisation in a form of a furniture collection. The modular structure achieved by sheet perforation with dedicated connectors enables infinite construction arrangement. Our surrounding is no longer static, we are living in a constantly changing environment which requires our furniture to be adjustable depending on our needs. From micro scale like home office or workshop to macro like facades, 3+ is able to fit in every environment and space. Home, kitchen, lounge room or retail area, it has no limits. With minimum elements we can get maximum results and create our own space that can be changed without any effort.

Table is the perfect base for creating a functional work-space, furnishing conference or dining room.

3+ is innovative technology
for stabilising sheet-metal,
in the form of our furniture
collection 3+.

3+ a mobile operating system with standard metal or wooden legs. Relation of a wood and metal is now closer to you. Boxes completes the functionality of the table.

Thanks to our domesticated technology, even the workshop of innovation gives the impression of being an integral part of all of interiors. Applications allow you to discover and explore further possibilities of 3+.

Few elements, many solutions

Set 01

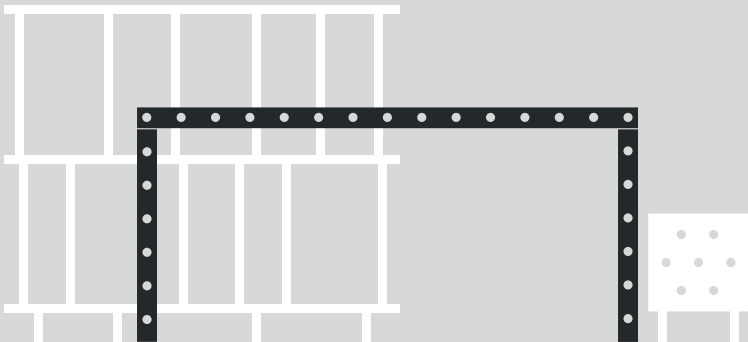

Thanks to a simple system of connectors and versatile elements everyone is able to give each product a new context, function or even create new objects.

Zieta Prozessdesign develops design in new technologies. Unique products are created as a result of experimenting with innovative forming methods. Zieta Prozessdesign combines 3 forces – research, design and production to bring complex design solutions and to eliminate any imperfections or inefficiencies on any stage of bringing concepts to life. At Zieta Prozessdesign new ideas search their intelligent forms – bionic, easily customized, uniquely processed, more efficient – that go beyond today's understanding of form and construction and contribute to the shapes of the future.

Designed and manufactured in the EU.
