

9th Edition

Healthcare Disrupters Congress

"Innovation you can TRUST. Outcomes you can MEASURE"

Using AI-Powered Insights

Tuesday, October 6th, 2026 | Dubai - UAE
Sofitel Dubai Jumeirah Beach Hotel

The background of the entire image is a vibrant blue and teal gradient. At the bottom, there is a silhouette of the Dubai skyline, including the Burj Khalifa. Overlaid on this is a network of white lines connecting various points, and a white heartbeat line that runs horizontally across the middle of the skyline.

DUBAI

A Message of Appreciation

Rim El Aridi

Co-Founder & Managing Director
Agora Group

Dear Distinguished Delegates, Speakers, Partners and Sponsors,

On behalf of Agora Group, I would like to express our sincere appreciation to everyone who contributed to the success of the 9th Healthcare Disrupters Congress, held in Dubai under the theme:

"Innovation You Can Trust. Outcomes You Can Measure."

This edition brought together an exceptional community of policymakers, healthcare executives, clinicians, investors, innovators and technology providers to examine how artificial intelligence and other disruptive technologies are reshaping the future of healthcare.

The discussions reflected an important evolution within the sector. The conversation is no longer limited to what technology can achieve; it now focuses on whether innovation can earn the trust of clinicians and patients, integrate successfully into healthcare systems, demonstrate measurable clinical and financial value, and ultimately be implemented at scale.

Throughout the congress, our speakers and delegates explored some of the most pressing priorities facing healthcare today: AI-enabled care ecosystems, ambient intelligence and physician burn-out, workforce readiness, ethical AI, data privacy and cybersecurity, health equity, value-based care, digital-health investment and the challenge of moving promising solutions beyond the pilot stage.

These conversations were particularly relevant in the UAE, where healthcare transformation is already taking place at remarkable speed. Through forward-looking policies, investment in technology and data, and close collaboration

between the public and private sectors, the UAE continues to demonstrate how innovation can be translated into better healthcare delivery and improved patient outcomes.

Beyond the conference sessions, the carefully curated one-to-one meetings created opportunities for direct and productive engagement between healthcare decision-makers and solution providers. These focused conversations remain at the heart of Agora's approach and our commitment to transforming introductions into meaningful partnerships and measurable outcomes.

We extend our deepest gratitude to our distinguished speakers and moderators for sharing their knowledge and challenging us to think more critically about the future of healthcare. We also thank our sponsors and partners for their confidence in the congress, and our delegates for their active participation and valuable contribution to every discussion.

At a time when the GCC and the wider region are navigating uncertainty and considerable challenges, we would also like to express our profound

appreciation for the leadership of the United Arab Emirates. The country's commitment to stability, progress, tolerance and human development continues to inspire confidence throughout the region. Its unwavering belief in a peaceful, prosperous, bright and happy future reminds us that even during difficult times, progress must continue and optimism must prevail.

The success of the 9th Healthcare Disrupters Congress belongs to everyone who participated in it. We hope that the ideas exchanged, relationships established and opportunities identified will continue to generate value long after the event.

Thank you for being part of this important journey. We look forward to welcoming you to the next edition of the Healthcare Disrupters Congress.

With sincere appreciation,
Rim El Aridi

About Media Partner

We are ideal facilitators helping clients raise capital, close sales, enter new markets, secure partners and communicate with a pre-selected audience. We offer event curation and market research services to help grow our clients' businesses. At Agora Group, we understand that although capital is fundamental, the hand behind it is often even more so. At our Private Investor Meetings, we pre-qualify investors based on our clients' needs and facilitate communication between the client and their chosen investors before and after the event. This "hands on" approach to investor hunting has helped our clients secure investors that elevate not just their capital but also their partnerships, connections and brand.

This year, we're gearing up to redefine the boundaries of healthcare innovation.

HEALTHCARE DISRUPTERS CONGRESS
Dubai - 6 October 2026

Dr. Angela Thomas 2nd
Maximizing your business success: Scale up
Book an appointment
Oct 8 - Edited

What does it really take to scale healthcare?

On Tuesday at the Healthcare Disrupters Congress in Dubai, I had the pleasure of joining the panel "Where Smart Capital Goes Next: Investing in What Scales" alongside [Nasser Massoud](#), moderated by [Hamid Kara](#).

We spoke about funding, risk and what makes a healthcare opportunity investable. For me, one part of that conversation deserves much more attention:

The people who will actually deliver the care.
A hospital can invest in technology, equipment and a beautiful facility. But if the right specialists cannot join the team, or if the workflows around them are missing, growth becomes difficult to sustain. That thought followed me through the day.

[Aishah Al Hartthy](#) and [@Muhammad Farhan Sher](#) D1 discussed what it means for healthcare professionals to be truly ready for work clinical

AKT Health Inc. 2nd
Oct 5

What if healthcare could recognize risk earlier and act before it escalates? Tomorrow in Dubai, that question takes the stage.

AKT Health Inc. joins the **Agora Group 9th Healthcare Disrupters Congress (HDC)** as a Gold Sponsor, connecting with healthcare leaders and innovators shaping what comes next in digital and connected care.

Tomorrow | 6 October 2026
Dubai, UAE

Aditya Tallapragada, President, **AKT Health Inc.**, will take the stage to explore a more proactive approach to connected care built around three principles:

- #PREVENT** escalation through timely intervention
- #PROTECT** through more continuous, connected care
- #PREDICT** emerging risks earlier

As **AI** and connected **Healthcare** become increasingly embedded in care delivery, the opportunity is to turn signals into meaningful actions while keeping patients and clinical outcomes at the center.

If you're attending HDC, meet the AKT Health team and be part of the conversation. See you tomorrow, Dubai.

A privilege to be part of the 9th Healthcare Disrupters Congress, alongside H.E. Dr. Amin Al Ameri, Assistant Undersecretary at MOHAP, one of the UAE's most respected healthcare leaders.

His inspiring insights and exceptional presentation of the UAE's remarkable healthcare achievements reflected the visionary leadership driving this nation's progress.

My appreciation to Agora Group for bringing together distinguished leaders and innovators for meaningful dialogue on the future of healthcare.

True healthcare disruption is not just about AI and technology, but about advancing prevention, healthy longevity, and patient-centric care—making healthcare more accessible, affordable, sustainable, and compassionate.

It was great to be back at the 9th Healthcare Disruptors Congress, where this year's theme focused on "Innovation you can trust, outcomes you can measure." Using AI-powered insights".

The event opened with Dr Amin Al Ameri (Assistant Undersecretary of the Health Regulation Sector at MOHAP), reflecting on how far healthcare in the UAE has come and where it is heading next. This was followed by interesting presentations and panel discussions around AI advancements within this sector, including AI-powered tools to support and enhance faces such as:

As always, it was lovely to see familiar faces such as **Main Gadi**, whilst also meeting many new ones including **Dr Aisha Mohammad Subai** and **Dr Fatima Al Kibbi** from **DSHUM** | **مؤسسة الإمارات للصحة** and **Dr. Sheela Inan, Sahar Emran** and **Kavitha Mohandas**.

Many thanks to **Makram Mulaeb** and the **AgoraGroup** for inviting me to the event again this year!

Today I had the opportunity to attend the Healthcare Disruptors Congress "Innovation You Can Trust, Outcomes You Can Measure."

It was a genuinely valuable day, thoughtful discussions, innovative solutions, AI-driven possibilities, and connections with people from different healthcare backgrounds.

I left the congress with one reflection that stayed with me:

Healthcare does not necessarily lack innovation, what we need more of is integration.

Many of the solutions presented today were impressive. But from a healthcare informatics perspective, I kept thinking about what happens when these solutions enter real clinical environments.

The greatest value will come when innovation can build on what healthcare organizations already have, integrate into existing systems and workflows, and reduce rather than introduce additional steps.

Healthcare professionals should not have to navigate multiple disconnected solutions, duplicate documentation, or spend additional time figuring out how different technologies communicate with one another.

The ideal future, to me, is not simply more technology.

It is connected technology solutions that integrate with the existing digital ecosystem, minimize disruption, reduce duplication, and ultimately give healthcare professionals more time where it matters most: with the patient.

We have the resources.
We have the solutions.
We have the expertise and innovation.

Yesterday

Spent a full, insightful day at the 9th Global Healthcare Disruptors Congress with **AgoraGroup** here in Dubai!

The schedule covered everything from national vision to the grit of scaling digital health and biotech. A few standout moments across the program:

- Setting the Strategic Vision: I.E. Dr. Amal Hassan Al Ameri's keynote set an inspiring tone on how the UAE is evolving its healthcare regulation and public health frameworks to champion regional innovation.
- Love the back to back AI perspectives: from **Aditya Tallapragada AKTHealth Japan** breaking down their Predict, Prevent, Protect framework, to the practical case study by **Dr. Hessa Aldehaili and Eng. Muhammad Muddassir** | **مؤسسة الإمارات للصحة**, **SMREI, MBA, CPMBAS, eFACMG** on using ambient AI to out-discard admin load.

Renee Mansour (EVS) also shared an intriguing look at Human Performance OS for real-time health data, followed by a great fireside chat on preparing the healthcare workforce for tomorrow.

Scaling Past the Valley of Death: My favorite panel Scaling Innovation Across Healthcare's Valley of Death with **Gurjan Bhardwaj** (Partes AI), **Dr. Ahmed Eissa** (Saudi German Health), and the **EVS** Life team. They had a candid, really-cheap discussion on why so many successful pilots fail to reach full deployment, and how dedicated funding and targeted partnerships can help cross that gap.

Thanks to **Im Elendi** @Dr.Mazin.Gadri and team for putting together such a high-value day!

What a privilege to attend the 9th Healthcare Disruptors Congress at **Sofitel Dubai Jumeirah Beach**, stayed at this hotel during my very first trip to Dubai almost 10 years ago as a tourist, and now I am returning as a "Healthcare Disrupter" as deemed by the congress.

This was another impactful gathering of the top industry and government leaders, all coming out to share expertise and create the best possible healthcare future for the UAE. Thank you to the organizers **AgoraGroup** and all speakers for a great talk.

A special thank you to **Dr. Narges Sheikhansari** and **Dr. Mazin Gadri PhD MSc BEng PMP PMPi LSSGB EBAS Agile** for great conversations, good laughs, and sharing their knowledge with me. I also want to shoutout all the great people that I met. I'm sure this will be the start of great partnerships.

Dubai Doc's Fast Track • 2nd
Sep 29

WOULD YOU INVEST IN A HOSPITAL THAT CAN'T GET ITS DOCTORS INTO PRACTICE?

- Healthcare investment is often discussed in terms of buildings, technology and market size.
- But between an investment decision and a patient receiving care, a great deal has to happen.
- The right specialists must be found.
- They must be licensed and ready to practice.
- The clinic must be ready to work with them.

And patients must be able to reach the care they need. THAT IS WHERE SCALING BECOMES REAL.

On 6 October, I'll bring this perspective to the panel "Where Smart Capital Goes Next," investing in What's Next" at the 9th Healthcare Disruptors Congress in Dubai hosted by **AgoraGroup**.

I'm looking forward to exchanging views with my moderator **Masud Kara** and fellow panelists **Dr. Ghida Harfouch**, **Maswan Abdulaziz Janahi** and **Dr. Sara Al Dallal** at **Angel Success Consulting**. Your Partner for Exponential Business Growth and **Dubai Doc's Fast Track**, we connect internationally trained doctors, healthcare providers, and international patient pathways. I'm proud that **Angel Success Consulting** is also joining the congress as a Silver Sponsor. Thank you, **AgoraGroup**, for bringing this conversation together.

I will be speaking at the "9th Healthcare Disruptors Congress" taking place on October 6th in Dubai, bringing together healthcare leaders, policymakers, innovators, investors and technology experts to explore what it will take to shape the next generation of healthcare.

This year's discussion centres on the "future of Medical Advancement" and an increasingly important question the health systems have to move from: promising innovation to solutions that deliver measurable, trusted and sustainable impact?

It is moderating the panel "Scaling Innovation Across Frontiers: The Value of Smart", a conversation particularly relevant as a time when healthcare is seeing no shortage of pilot, technologies and ambitious ideas, yet comparatively few successfully make the transition to system-wide adoption.

We'll explore why promising healthcare pilots to often struggle to scale, what needs to change within organizations and across the wider ecosystem, and how we can ensure the responsible adoption of technologies and AI, and generally without allowing the pace of innovation to outstrip trust, evidence or system readiness.

#DigitalHealth #AIinHealthcare #PublicHealth #HealthPolicy #HealthcareInnovation #HealthTech

Axora.AI • 2nd
AI
Sep 21

What does it take for digital health to move from promise to something healthcare organizations actually trust, adopt and see value from?

That's one of the conversations happening at the **AgoraGroup's 9th Healthcare Disruptors Congress** in Dubai on October 6, where our Founder and CEO, **Dr. Manoj M.**, will be joining leaders from across healthcare and technology for a panel discussion.

The conversation will look at trust, adoption, ROI and scalability, and the realities that come with putting new technology to work in healthcare.

These are questions that matter to us at **Axora** too. Technology can have strong capabilities, but for healthcare organizations, what ultimately matters is whether it fits into the way they work, helps solve a real problem and delivers outcomes they can see and measure.

We're looking forward to having **Dr. Manoj** be part of the discussion and to sharing some of the perspectives that come out of it.

Stay tuned for more from Dubai next week.

I'm pleased to be joining the 9th Edition of the Healthcare Disruptors Congress as a speaker on 6 October 2023 in Dubai under the theme "Innovation you can TRUST, Outcomes you can MEASURE" - Using AI-Powered Insights.

As I continue to reshape Healthcare, the conversation is moving beyond experimentation. The real challenge is how we transform innovation into trusted, measurable and sustainable outcomes - supported by the right culture, governance, digital foundations, and operating models.

I look forward to sharing my perspectives and experiences in healthcare digital transformation, exchanging ideas with fellow healthcare leaders, and discussing how we can move from the promise of AI to practical value for patients, clinicians, and healthcare organizations.

A special thank you to **AgoraGroup** and **Makram Mulaeb** for the invitation and the opportunity to contribute to this important conversation.

For those interested in joining us, you can find more information and register here: [https://www.agoragroup.com/HealthcareDisruptorsCongress](#)

20 Minutes

Fireside Chat

Building the Future-Ready Healthcare Workforce From Credentials to Competence, Readiness, & Performance

Healthcare is evolving rapidly, placing new demands on the people responsible for delivering care. This fireside conversation explores how healthcare organizations can move beyond traditional credentials to build a workforce that is truly ready to perform, adapt and grow. Leaders will discuss the evolving meaning of workforce readiness, from competency and onboarding to workforce planning, continuous development and performance, while exploring how data and technology can support better workforce decisions without replacing human judgment.

Panelists:

- Assilah Zaher Al Harthy - Founder & Chief Executive Officer, Nursel
- Dr. Farhan Sher - Group Director, Operations & Human Resource Management, Fakeeh Health

Meeting 1 - 15 Minutes	Meeting 4 - 15 Minutes

TESTIMONIALS

It was a privilege and pleasure to be part of the 9th Healthcare Disrupters Congress, an excellent platform bringing together visionary leaders, healthcare professionals, and innovators committed to shaping the future of healthcare.

I particularly appreciated the insightful discussions, distinguished speakers, and meaningful networking opportunities. The Congress reinforced my belief that the future of healthcare lies in innovation, AI-driven transformation, preventive care, healthy longevity, and, above all, a patient-centric approach.

My sincere compliments to the organizers for putting together such an engaging and impactful event. I look forward to being associated with future editions and contributing to the ongoing transformation of healthcare.

Dr. Raza Siddiqui - Managing Partner, *Arabian Life*

Thank you so much for the kind invitation and the wonderful arrangements.

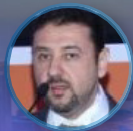

I truly appreciate your hospitality, support, and the valuable, informative insights you shared.

The session was very beneficial and provided up-to-date information on the latest developments, recent research, and emerging trends.

It was a great opportunity to learn, gain new perspectives, and stay updated with the latest advancements in the field.

Thank you once again for your support and for organizing such an informative and valuable session.

Maysoon Khalil Yousef - Director, *Fakeeh University Hospital*

Thank you for inviting me to join this great and well organized event, the topics and sessions were very informative, useful and interesting.

The panelists' insights were valuable and the interactive discussions with the attendees were also very fruitful.

Looking forward to more and more successful congresses in the future.

Dr. Adel Mohamed Yasin Alsisi - Chief Medical Officer, *Prime Hospital*

Thank you for the opportunity to be part of the event. It was a great experience, with a wealth of valuable knowledge and excellent networking opportunities with experienced healthcare professionals.

Dr. Sharifa Alamadi - Deputy Director, *MOHAP*

I can clearly see the difference at this point and would like to acknowledge the effort invested in capturing current disruptive technologies and creating a platform that brings together healthcare leaders and stakeholders to review, reflect, and engage in meaningful discussions.

I particularly appreciated the structured meeting format, which provided a valuable one-to-one opportunity for both parties to discuss the proposed technologies and the contributing factors that may influence their adoption.

Last but not least, I would like to commend the excellent organization and hospitality throughout the event.

Thank you for your efforts and commitment.

Hana Ibrahim Abu Sharib - Nursing Informatics Manager, SSMC

To the entire Agora team, thank you for your professionalism, warmth, and attention to detail. You made us feel genuinely welcomed and valued throughout.

I mentioned Agora's slogan, "Bridge Value," during my fireside conversation because I truly believe in what it represents. You have brought those words to life by connecting the right people, creating opportunities, and building relationships that extend well beyond the event itself.

Please know that you have our sincere appreciation and continued support. We look forward to supporting Agora's future initiatives and building on the relationships established.

Thank you once again, and congratulations on a truly successful congress.

Assilah Al Harthy - Founder & CEO, Nursel

Agora's Healthcare Disrupters Congress brought together healthcare professionals for discussions on some of the key issues facing the industry.

The sessions offered very useful insights & the congress was well managed.

We appreciate the professionalism and support of the Agora team throughout.

Dr. Manoj K. Menon - Founder & Chief Executive Officer, AXora

Healthcare Disrupters Congress was one of the most relevant and high-quality healthcare events I've attended in the region. What stood out was not only the quality of the speakers, but the level of decision-makers, innovators and healthcare leaders in the room. The conversations were practical, forward-looking and focused on real transformation in healthcare. For ELYS Life, it was a valuable platform to present our vision, build meaningful relationships and explore new opportunities for collaboration. I would be very happy to participate again.

Renat Mansurov - CEO & Founder, ELYS Life
