

# Collaborative Managed Data (TecCMD)

Article and price information supplied by parts suppliers to parts distributors in a standardised format

In accordance with validation rules, the supplier can provide its parts distributors with targeted information on customer-specific product ranges and prices, based on the established business relationship. The solution is independent of the ERP systems of the parts suppliers and distributors. Parts distributors can download the article and/or price information from the platform automatically or via a Collaborative Managed Data Web Client in CSV, XLSX or XML format.

## What does the solution consist of?

- Collaborative Managed Data platform
- Collaborative Managed Data File Transfer for the transfer of supplier data to and/or from the central platform of the parts distributor
- Collaborative Managed Data Web Client
- SAP component for parts suppliers and distributors

## What does the solution do?

Receipt of article and price information from the supplier

Validation of supplier input data on the platform according to configurable settings

Management of business relationships via the TecAlliance Solution Portal

Encrypted data transmission via https connection

Parts distributor can generate a report on recently changed supplier data

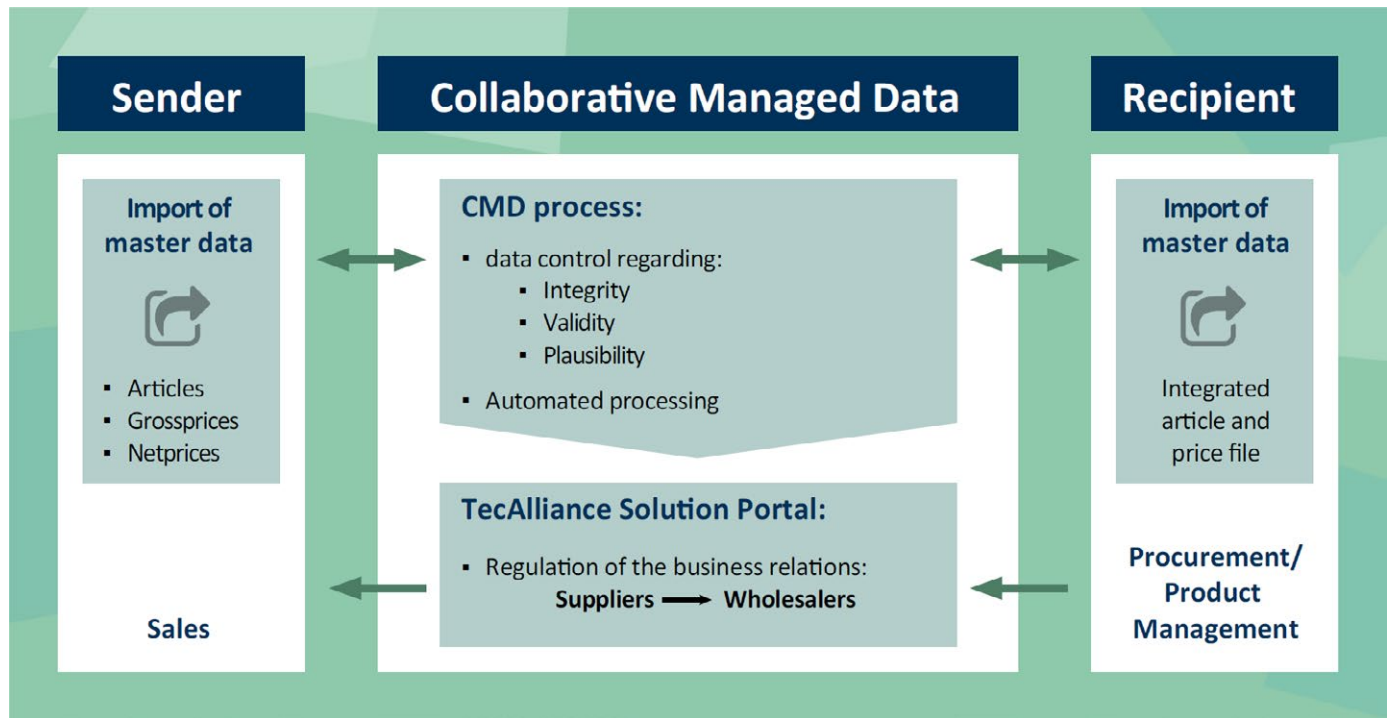

Parts distributor can choose between a full extract or the updated information of its business partner

**Cost reduction**

Increased process quality

**Master data  
synchronisation**

## The solution at a glance:

## Why Collaborative Managed Data?

- Article and price information can be provided on an individual customer basis
- Standardised provision of information minimises manual reworking of the data on the retail side
- Automated data transfer by the supplier and data collection by the distributor shortens the time-to-market time frame
- Reduced processing costs through automation
- Returns processes are reduced due to improved data quality

## Key facts

**300,000** articles **2 million** net prices  
**450,000** gross prices
