

Order (TecOrder)

Electronic order platform for the independent automotive aftermarket

Electronic communication platform for automation of purchaser-supplier processes. The purchaser can check availability in the online dialogue and order spare parts. Through supplier responses orders are confirmed, deliveries announced, and invoice data transmitted. Standardised message formats are used for data transmission. Various integration levels and interfaces are available for both the purchaser and the supplier, ensuring optimum inclusion in the existing process.

What does the solution consist of?

- **The biggest B2B platform** of the automotive aftermarket
- **Order Web (formerly TecWeb)** web-based platform for order handling
- **Order Local** - local application for order handling
- **ERP integration modules** - ready to use modules for integration in SAP or Axapta
- SDK kits or web services for own integration
- **Order to Invoice conversion service** - conversion of the data into all common formats

What does the solution do?

Availability enquiry

Express order

Stock order

Order confirmation

Delivery notification

Format conversion (e.g. TecForm, TXML, EDI (ClepaFigiefa D96.A), ANSI12)

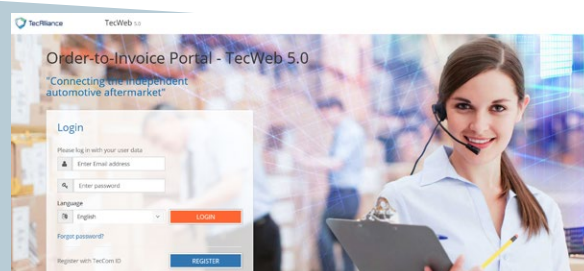

Parts order

End-to-end solution

Order processing

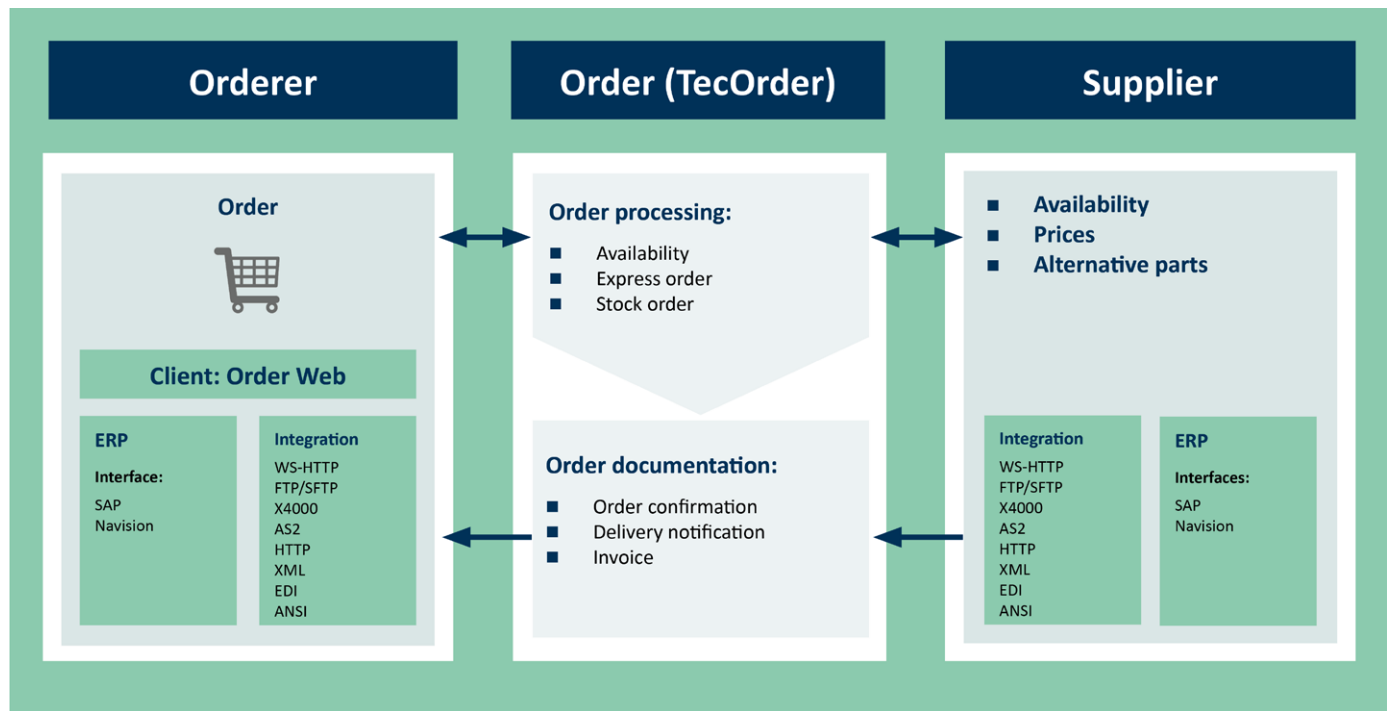

Automation

Cost saving

Order Web

The solution at a glance:
