

TecDoc Web Shop

The personalised B2B web shop solution for automotive aftermarket distributors

The TecDoc Web Shop is a personalised B2B shop solution that shifts the order process online. Distributors, corporate clients and prospective customers reach the shop page via an access area (login) and can learn about current product availability and individual price agreements for specific articles. For further automation of the order process, the shopping cart function and connection to the in-house ERP system is provided.

What does the solution consist of?

- The world's largest vehicle database with approximately 110,000 unique vehicle types
- 6,300,000 standardised product descriptions and numerous images in 35 languages
- Technical data for repairs and maintenance of cars and trucks
- Indication of recommended retail prices
- Individual price and availability displays
- Shopping cart and order function

What does the solution do?

- Article comparison
- Personalised UI
- Individually adjustable functionality
- Import and export of shopping cart contents
- Optional integration of technical data

The solution at a glance:

Why TecDoc Web Shop?

- **Personalisation:** The shop design can, based on various templates, be largely adjusted to individual customer requirements.
- **Flexibility:** In addition to the data from the TecDoc Web, customer-specific products and prices can be integrated into the web shop.
- **Comfort:** Direct connection of the web shop to the ERP system automates your order process. Your order-related information is thus always correct and up-to-date.
- Product information based on TecDoc Catalogue data
- Direct integration of in-house products and prices
- Several options for personalising the shop design
- Direct connection to your ERP system
