

# TecDoc Web

Web-based spare parts catalogue with vehicle and product information from around the world

TecDoc Web is a low-cost, easily-accessible alternative to the classic TecDoc Catalogue DVD. It offers current and comprehensive data for the identification and provision of parts – in a standardised data format. Our catalogue provides workshop professionals with comprehensive vehicle identification information and allows the appropriate selection of vehicle spare parts. Maintenance information and additional convenience functions, including VIN filters and a graphic search, complete the contents of the catalogue. We have collected and linked all workshop-relevant information for you on one platform.

## What does the solution consist of?

- The world's largest vehicle database with more than 110,000 unique vehicle types
- 6.3 million product descriptions with images in 35 languages
- Technical data for repair and maintenance of cars and trucks integrated in vehicle and article search
- Vehicle identification using VIN filter, as well as country-specific input option (number plates, KBA, etc.)
- Indication of recommended retail prices (OE und IAM)

## What does the solution do?

Integrated shopping cart

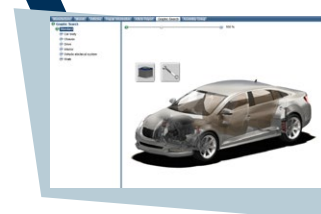

Multi-user offerings

Optional integration of repair and maintenance information (RMI)

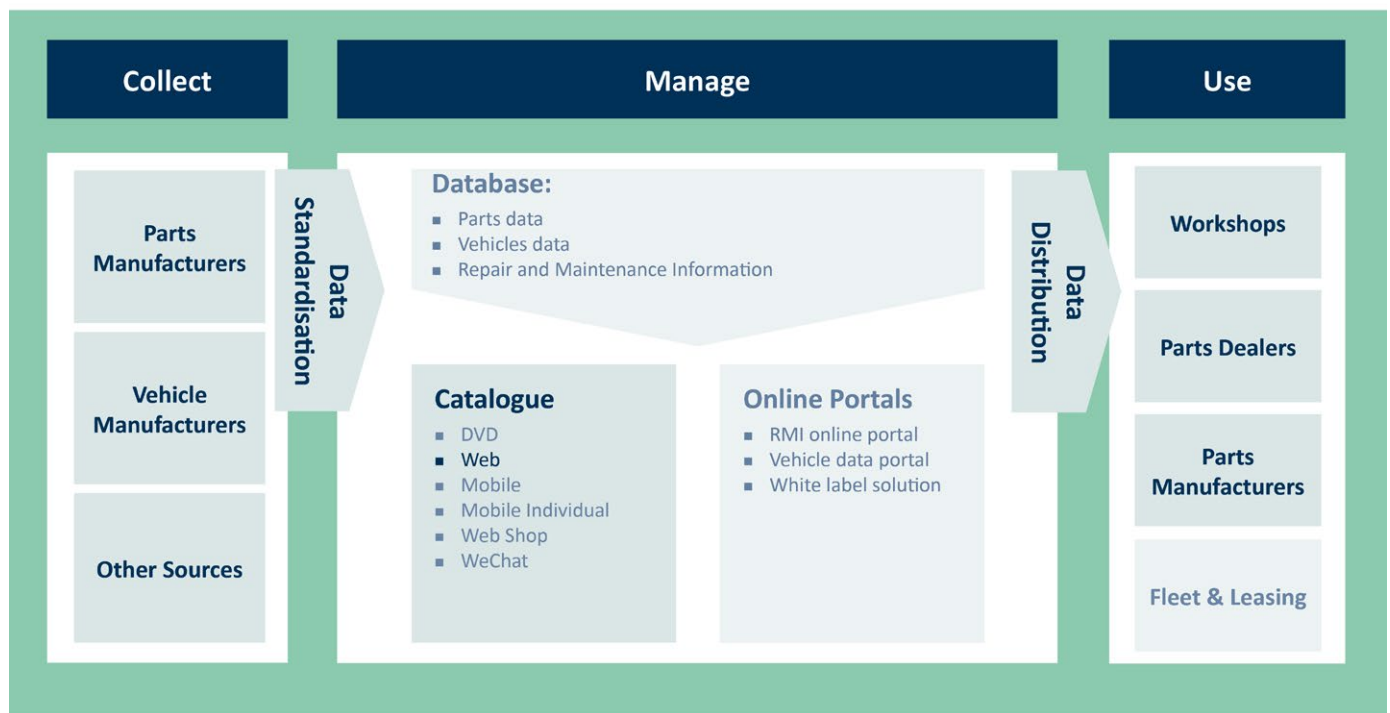

Export function for direct order or integration into in-house ERP system

Turnkey integration into SAP or further ERP systems

**TecDoc standard**  
Vehicle identification  
"one-stop" service  
Part descriptions and information  
**Technical Data**
