

Recovery Audit

Improve your financial results without economic risk

By looking back, we improve your organisation's results going forward. Qvalia Consulting is the Nordic leader in Recovery audit services. We identify and correct purchase-to-pay transactions, up to six years retroactively. Our customers improve their financial results, recover capital, and get unique insights to improve their transaction processes. Without economic risk.

Lost in transaction?

In a perfect world, transactions work like a clock. However, that is not the case for most organisations. Despite being armed with a well-oiled AP machinery, best practices and technology at our fingertips, the pitfalls in accounts payable are numerous. Research has shown that up to 1% of the total purchase volume is lost in the transaction.

Get on track

Every year, we analyse some EUR 200 billion worth of transactions, identify errors and recover capital for the largest companies and organisations in the Nordic region. Missed VAT deductions, overpayments, double payments. We find it. With no economic risk for our customers. Our projects are on a no cure, no pay basis.

Services

RECOVER CAPITAL

Improve your bottom-line without economic risk. Our experts recover capital by analysing, identifying, and correcting erroneous invoices and wrongly managed transactions.

TRANSACTION INSIGHTS REPORT

The hidden keys to unrealised efficiencies. Recovery audit projects are presented and summarised in a report with recovery findings, a top-level automation potential analysis, and key learnings to prevent future capital leakage.

DIGITAL READINESS ANALYSIS

The next step towards realising your most important asset – data. Digital readiness analysis by Qvalia is an additional service that provides an actionable P2P and O2C automation roadmap, through a complete assessment of transaction data.

How it works

Export data

Your transactional data is exported to Qvalia. Up to six years retroactively.

Analyse

Our experts conduct data mining and analysis.

Regain lost capital

We correct errors and regain your lost capital.

Get insights

You get insights into preventing future errors.

RESULT

- Improved financial results by regaining capital lost.
- Unique insights into challenges, opportunities and pitfalls in the purchase-to-pay process. The Transaction Insights Report provides data-driven learnings in invoice management, automation potential, and accounting complexity.
- A best-in-class starting point for transforming processes, automating manual work, and preventing future capital leakage.
