Attractive and extremely durable:

Silikal reactive resin flooring for "Life & Style Hotel Kameha"

Silikal®

Expect more from your floor.
Hygiene and Safety for Hotel Kitchens

The 2009 newly opened „Kameha Grand" on the Rhine riverbanks by Bonn promises exclusive service. The luxury establishment relies entirely on Silikal's reactive resin flooring within its multiple kitchen facilities. A total of 1,400 square meters were coated with a seamless and low maintenance colour quartz system.

The building of the futuristic looking "Kameha Grand" sets high standards. Floor systems made of Silikal reactive resins completely fulfilled the need for hygiene and safety for the kitchen facilities. The outstanding durability combined with the extremely quick install made the material first choice in tough areas like the cooker line, the coolers and around the drains.

A very appealing and extremely durable floor was created, entirely in accordance to the strict local regulations for slip resistance, yet a snap to clean.

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.
