

Robust, safe, hygienic:

Flooring from Silikal for the "Schönberger Hof"

Expect more from your floor.

Heavy duty and attractive:

Milking carousel with Silikal coating

With extreme ruggedness and high load capacities the reactive resin flooring from Silikal prove themselves time and again at the milking plant of the 'Schönberger Hof' in the Westerwald. For this new building project speed was also crucial: the applied coating required only about one hour to cure and be fully loadable again.

In the area of the milking carousel the blue-white flooring received a non-slip colour quartz addition and in the accessible outer area a colour

flake design. Resistant against high mechanical as well as several chemical loads, for example against lactic acid, milk fats or feces it is easy to clean thoroughly. A transparent Silikal sealing also protects the red brick walls of the building making them also easy-care. The 56 meter long feeder table was also coated with the reactive resin system, just like the base area on the walls. The corners of the floor were given a triangular wedge to make cleaning easier.

Silikal
made in Germany
since 1951

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.

Expect more from your floor.
