

APRONE s.r.o.

AI Assistant for Non-Profit Organizations

UNIQUE SELLING POINTS

Unified platform for managing all administrative activities of a non-profit organization in one place
Developed specifically for the needs of Czech non-profit organizations and compliant with local legislative requirements
Specialized tools for grant project management and documentation required for grand reporting
Integrations with widely used accounting and invoicing systems (e.g. Fakturoid and iDoklad) as well as Google Drive
Intuitive user interface requiring no complex implementation or extensive training
Automation of routine administrative tasks, saving time for both employees and volunteers
Secure cloud-based solution with remote access and multi-user support
Modular architecture allowing organizations to use only the features they need
Continuous feature development driven by feedback from non-profit organizations

VISION

To complete the development of all key modules of the APRONE platform and create a comprehensive information system for small and medium-sized non-profit organizations. The company aims to build a stable customer base across the Czech Republic and become one of the leading digital solutions for non-profit management. The platform will continuously evolve based on user feedback, with a particular focus on project and grant management, human resources, accounting documentation, and document digitization. The company also seeks to establish partnerships with organizations supporting the non-profit sector and expand integrations with widely used accounting and information systems.
