

CLASSIC CAR SERVICES s.r.o.

Automotive Monitoring Unit

UNIQUE SELLING POINTS

- Displays key vehicle operating parameters in real time
- Provides immediate visual and audible alerts when preset limits are exceeded (e.g. oil temperature)
- Stores historical operating data for export and subsequent analysis
- Preserves the historical character and value of the vehicle

VISION

The company aspires to become a trusted partner for classic vehicle owners across the European Union. Its vision is to connect the world of vintage automobiles with modern technologies and innovations, significantly improving vehicle reliability, extending service life, and enhancing environmental sustainability. In the long term, this will contribute to preserving automotive heritage for future generations.
