

Neposedí Edu s.r.o.

An App for Kindergartens

UNIQUE SELLING POINTS

Connecting the entire educational cycle within a single system
Automatic evaluation of RVP compliance based on the programme actually delivered
Information entered once is automatically used across other parts of the system
The product is developed directly in cooperation with kindergartens and tailored to the Czech educational environment
Integration of educational work, basic administration, and communication with parents

VISION

To establish their app as a stable and well-known tool for early childhood educators in the Czech Republic, supported by a small in-house team and recurring subscription revenue. Within five years, the goal is for hundreds of kindergartens across the country to use their app.
