

Veriteus Technology s.r.o.

A Multimodal AI Platform that Detects Inconsistencies in Speech, Voice and Behavior in Real Time.

UNIQUE SELLING POINTS

Multimodal analysis combining audio, video, and text inputs within a single platform
Real-time assistance that suggests follow-up questions during conversations, not just afterwards
Scientifically grounded technology developer in consultation with leading academic experts
Decision support that enhances human judgment rather than replacing it
Responsible deployment with an ethical framework and clearly defined conditions for use

VISION

To become a leading decision-support tool for situations involving information asymmetry. The company aims to establish its solution in the insurance sector, expand into HR and security-related industries, and further validate the technology in collaboration with institutional partners.
