

Zakra s.r.o.

Specialists in Water Management Solutions for Residential and Recreational Properties

UNIQUE SELLING POINTS

Fast project processing – advanced automation of internal processes enables efficient preparation and delivery of projects

Transparent communication through a client portal – clients have a complete overview of their project status at all time

Extensive experience and high accuracy – thousands of successfully completed projects combined with digital quality control mechanism ensure reliable and high-quality outputs

Fast building permit approval process – streamlined communication with authorities and municipalities

Comprehensive services under one roof – from initial consultation and hydrogeological surveys to complete project documentation, permits, and final implementation

VISION

The main goal for the upcoming period is to significantly accelerate and streamline the entire engineering process – from the initial client consultation, through pre-project preparation and project development, to building permits and potential delivery of physical products. The company aims to further advance its existing digital tools by integrating advanced AI capabilities to automate complex tasks, connect fragmented data sources, reduce administrative workload, minimize errors, and enable faster project delivery.
