

# THE DAILY FEED

Issue 1

The News in 280 Characters

2018/2019

# Editor's letter

I am delighted to introduce the first edition of The Daily Feed, hot off the press from a year of unmistakably unsettling news.

The Daily Feed is a celebration of the global platform Twitter, and its role in the dissemination, interaction, and digestion of everyday news. From Brexit to porridge, meerkats to Trump, the eclectic and unpredictable nature of these headlines invites users to contribute (consciously or otherwise) to a new form of journalism. This form takes shape by stitching together below-the-line comments left in response to a variety of news stories from different media outlets. The results create a perspective that is neither one thing nor another. It is a stream of unconscious collaboration that underlines the surreal, amusing, and often worrying impressions we, as individuals, leave. All through 280-character tweets.

I think there is some kind of beauty in a nonsensical string of opinions that appear to unite and clash simultaneously. Where's the fun in reading the news from one point of view? I've always found the strength of conviction among commenters and contributors to be admired. Now, we can admire them in an environment of complete pastiche.

While some commenters and critics use this new-journalistic space to create humour or satire, others impose what could be read as propaganda. There is no reason these two perspectives cannot be intertwined and read as one. While it values each contribution independently – what brings The Daily Feed together is the curation of diverse thoughts as a recognition of how blurred and obscured the news often is. With this in mind, I hope you can find sense in the narrative nonetheless.

Each illustration corresponds to a parent news story, and displays my own perspective. You may have strong feelings regarding what I'm trying to say, in which case – please feel free to tweet your thoughts.

For example: @TheDailyFeed2 is #garbage!!!!

Of course, I'm inclined to disagree, but that's what makes the magic, baby.

Edith Ault, Editor in Chief

# Washington passes bill to become first state to compost human bodies

The Washington Post  
27.04.19

Isn't this how all the zombie movies begin? Weight me down and toss me in the ocean. I'd rather be fish food.

Oh cool! I can be turned into topsoil. Maybe I'll have better luck growing flowers. Hey I'm in. A lot cheaper than a \$10,000 funeral. Just get a headstone etched for me and slap it on the family plot. I was here. This is ridiculous! I want to be buried in an ornate casket that cost at least \$10,000.

I hope Granny Smith apples from Washington state are going to have a warning label. Will their apples still be vegan!? Sorry but that is so sick!!!! Really really gross!!!

Ok I eat nothing but carbs from now on. Don't want it on my flowers not a great idea. It's just carbon. But whatever. That is gross!! Who is going to want to eat vegetables or fruits that have been grown in compost human bodies. And what if there was diseases passed from that!! LMAO. We eat vegetables and fruits with compost and barnyard manure. Yum! That's totally different!! Human remains is in another category all on its own. What's next, SOYLENT GREEN?

Why? Just because something can be done, doesn't mean that it should be. Isn't it against the law to desecrate a human body? These are the bills they are working on! Do something about healthcare and tax cuts for us!!!! I can't wrap my head around this one. You'll be able to once you're composted. Love this! If y'all embalm or burn me, I will possess a doll and ruin your lives.

Was this the DEMS idea? They already wanna pass a bill to terminate a full term baby at birth, that's MURDER!! Setting the stage for mass murder of the elderly, terminally ill, and anyone the left deems ha threat.

Now that is something I was not expecting! Will it make it easier for serial killers to dispose of their victims? Two bags of Uncle Mulch, please. I'm sure a 50pound bag full of reporters will cost \$1.50. It would be great way to make my trees and grass grown. They also make good bar b que. The gift that keeps givin.

# The mystery of Julian Assange's embassy cat: where will it go? What does it know?

The Washington Post  
11.04.19

A harrowing but timely piece about the flux felines can find themselves in, when their owners commit fraud on a mass scale. This is the real story here people. Some say it was given to a shelter, some say it's with the family. We gotta bust this case wide open. Twitter! #FindThatCat.

My guess is it knows everything, check it's collar. The galaxy is on Orion's Belt... actually it's the RNC's hacked emails on his belt. The cat was obviously the brains of the outfit (because it's still at the embassy) and no doubt will find another Julian. Rumor has it the cat is now in the possession of the @CIA and being interrogated at a #DarkSite somewhere in the Philippines, amnesty international has filed a formal complaint with the United Nations.

Going into a whisker protection plan? Probably seek asylum in Russia. Now Snowden can have a buddy. The cat will throw him under the bus for a decent can of tuna. Beware the Novachoknip.... STAY AWAY FROM THE WINDOWS, KITTY. #PutinKills.

"can I lose the tie now?"  
I would adopt him but he has lousy taste in ties.

Is it possible... this cat is Assange... the Assange they took is a cat? Hopefully the cat will find an owner who smells better than the litterbox. I'm glad the cat isn't stuck in an embassy forever with someone who never loved him/her. I hope whoever has the kitty loves the cat with all of their heart.

The real question: Did he smear poo on it? This poor cat will need years of intensive therapy – just look at that cute face. That cat is INNOCENT!

What did Julian Assage's cat say? "Let meowwwwwwt!" Gone to live in Paris with the late Karl Lagerfield's cat Choupette. They are going to create kittie-leaks. Please let Kittyleaks become a thing. All of its leaks can be found in the litter box. I'll look forward to reading the Meowller Report.

I would adopt this cat. ;) I would take him and I would call him Guccifer and he would live happily ever after. As much as I

can't stand Assange, I have to give him credit for such a snazzily dressed cat. That cat has style!

This has kept me up all night with the worry.

## What does it know? It knows too much.

It knows PLENTY, but he gets a Presidential Purrndon!

Obviously this is a job for Larry at #10 and Palmerston at Foreign Office in a rare act of working together for the common good. Project Acoustic Kitty is now coming to a close.

I hear Schrodinger is looking for a new cat, It's Schrodinger's cat, Duh! Assange's cat. Come on now. A bit like Schrödinger's cat. Did it know anything when Assange was there or only because he has gone?

He's beautiful, I would happily take care of him. I have ways of making him talk. And, strangely, this handsome pudder looks rather like our wonderful Queen.

Im sure Pamela Anderson is making sure he's taken care of. I've heard rumors for months that she's actually his girlfriend. Now, w/ her defense of him it all kinda seems to be true, i think.

I just hope and pray that someone will TAKE CARE OF HIS CAT WHILE HE IS IN PRISON....BECAUSE THE ANIMALS DONT KNOW WHAT IS GOING ON WITH THEIR OWNERS. THEY'RE INNOCENT....

It's England, someone will adopt and love the cat, or it will take up residence at the Battersea Home for Dogs and Cats, the best place in the world for person-less pets.

Idk but I imagine #CNN #MSNBC and the rest of #FakeNews #Media will have endless stories on it! Hell I wouldn't be surprised if democrats supeoned the cat. Democracy Dies in Darkness & We'll Help by Turning off the Light!

Please don't tell my wife this cat may be available for adoption, she only has 3 cats now is feeling the need get her Crazy Cat Lady license renewed.

## If sugar is killing us, why does Britain farm so much of it?

Independent Minds  
11.04.19

## Cannabis could improve orgasms for women, study finds

The Independent  
12.04.19

Annnnd marijuana sales just went through the roof! This study is getting there after a loooooong lapse of blessed orgasms.

Don't encourage them, some are already in drugs. If ya have the right man that's all you need. Female orgasm. A new handbag or a foreign holiday can also work wonders.

But men and women can do that too? sounds like a load of whore to me. Independent always writes crazy shit. Are your ratings that bad?

Just sounds like another way of turning western women ever more degenerate. sick degenerates, orgasm = sin. People should study more important things than this drivel.

### No shit Sherlock.

Well it certainly improved them for me & I'm not married! It helps you forget Brexit for a while too! It does. These are tried and true facts, go ask a stoner.

Yes, yes, yes and it'll reduce the crime rate allowing further reduction in police numbers. Only now that big pharma sells cannabis do we get the positives. When it was all cash in hand with no taxes paid, cannabis was the evil incarnate. Funny that.

Bull-shit. So, a man instead of improving his sex performances suggests women to take weed to enjoy sex?

Is no one else thinking "what on earth went on during the testing phase?"... "Have you any ice cream?"

Is it true that cbd oil can damage the liver. I read it in an article. And also increase risk of cancer and mental health problems? Nope, it combats cancer and the little is known about the controversial psychosis link, it's more about tobacco and already having had underlying issues. For some it can make people more anxious, and that's probably a personal issue. Cannabis is not for everyone.

I'll go ahead and attest to that. "Why you getting high?" "To improve your orgasms. My wife can testify to that!!! Sex has not been the same since we both quit 6 years ago.

haha, health.

# Rhino poacher 'trampled to death by elephants then eaten by lions'

The Sun  
06.04.19

Nice to hear they worked together. Just animals making a better world.

Sick of all this new age fancy cuisine, as if anyone is going to order poached rhino in a restaurant anyway!

Bloody marvellous news. I'm an atheist but well done god. Hope he didnt give the lion indigestion... hows the elephants feet?? Hope they're ok.

Fantastic news. Good. Great! Best result of the day. Good. justice. Karma! This has made my saturday night! Best news i've heard all day (and its been a belter!) Great news. Finally good news!

After a shit day losing the grand national, this has cheered me up! Bet they had a feast... spare ribs, poached leg... hope they didn't complain to the elephant that their meal was delivered squashed. Tenderised!!!

Hope the lions didn't get a stomach upset. Go lions! Hope the lions didn't get anything stuck in their teeth... I do hope they didn't suffer any indigestion afterwards.

Absolutely no sympathy whatsoever! Hope the ones that got away got jailed. Beautiful group effort. I hope they enjoyed every last bite. That's what I call 'Teamwork', way to go, Animal Kingdom!

If Carlsberg did headlines... Carlsberg does not do karma but if it did it would be the best karma in the world! Absolutely AMAZING !!!! Is there ANY video footage ??? Excellent news! Have we got footage of this??!

Justice is SERVED! Wahey. Happy days! Yey. Great news. What a fantastic day. Beauty isn't it lol.

## Haha. Gutted! Literally...

Being though this is the sun, i was waiting for "And his bones were beamed up by aliens". Hope the Lions dont get constipated.

Isn't that a shame NOT!!! If there's a HELL I hope he's in it being hunted for eternity! Welcome to the food chain! Love it. Sweet, animal justice... #LearningLessons.

This is another case of the hunter getting hunted. Kudos Jumbos and Simba for job well done. Keep it up! Sounds like karma to me... mother nature 1, hunters 0... xx

# Emperor penguins are suffering the worst breeding failure in 60 years

The Washington Post  
07.03.19

Oh no! I love penguins so much!! Oh no!! I LOVE Emperor penguins! Are you ready to lose iconic animals? It's happening. Humankind causing pollution & global warming hurts species. Let's use as much as possible only renewable energies !!! !!!

I reported this article as FAKE NEWS. Got anything else you ding bats can blame on 'climate change'? Anyone who eats meat or fish is destroying the global ecosystem.

You should like a super hero who protects fish. Good luck. Sorry but just existing is the real problem - meat and fish just adds a little bit more impact. What about the penguins? Don't forget about them! Excellent, I hate penguins.

Global warming lol. CNN be like: Trumps new tax plan wipes out penguin colony. And I'm actually supposed to give a rat's rectum... Chill, this is just a liberal hoax. The short term profits of our corporate masters are far more important than our grandchildren's future. Good thing about being old, won't have to live through the climate collapse that some incompetent leaders refuse to recognise. Donald Trump thinks that climate change is fake news, so it must be because all the mummy penguins had headaches this year.

## 'Tarantino Does Happy Feet'

These really are the saddest stories. Stuff humanity. Roll on the supervirus. Really? Because some penguins died? Some?

Pin the location, I'll go fuck these penguins myself if it come down to it. This wasn't a 'breeding' failure, this was 'the ice shelf completely collapsed beneath the colony because of global warming' failure. Global warming is like santa . A myth. Radiation, oil pollution. Take your pick. If you stretch a little further you'll find the Kevin Bacon connection.

Of course, everything should be done to help these incredible penguins. We simply do not have the right to intrude on their environment again... free sledge rides to the edge of the massively increased ice? heat up the atmosphere?

FKN brexit I suppose. So very sad these penquins are so beautiful x Oh well!

# Trump video tweet using Batman music removed due to copyright law

BBC News (World)  
06.04.19

He shouldn't get to use the Batman music since he just isn't cool enough, and he is definitely NOT a crime fighter. He should have waited for 'The Joker' soundtrack. way more appropriate.

How soon until he signs an executive order allowing him to infringe copyrights... you think he'd get a license for it... not hard and doesn't cost much either... still thinking he is on reality TV. Why does it not surprise me that he regularly lifts copyrighted material?

Hold onnnnn!!!!!! Someone used a law against the president? Dumpy is lawless... immune to laws... immune to common sense. Trump just has zero concept of how laws work. All he needs is a broadcasting license to use any music he wants if he pays royalties.

Why would anyone think he would care about copyright law? He doesn't care about any laws. He probably didn't make the video... Lol! Can you imagine?

That's happened with other president's who have used music w/o permission... Fake - It was @realDonaldTrump choice due to finding out Batman kneels at football games and used to report to @Camey. Ok that's what happened.

This is not news. Happens all the time to literally everyone. same old bbc bias propaganda get the real news you're not showing. BBC = FAKE NEWS... !!!!

Only 1 Knight for Metropolis, Thank U POTUS. Every tweet I read of his, I have the Benny Hill theme in my head :D. President Trump should use THIS intro for his 2020 Re-election campaign. It is MUCH more apropos. Wolfmother's Joker and the Thief would be a suitable song too. "The Dark Night Rises"? Shit, I missed that one.

Suddenly, everyone is ok with Article 13. Highly illegal stuff like this, not to orchestrate cover-ups of your

high crimes & misdemeanors. But not suspended. Hmm. Aaahh yes we all witnessed that. What else is more in our future? Twitter suspends presidents account for posting inappropriate video of Joe Biden?

There you go, a con job in every aspect of his presidency. USA needs a Batman to get rid of the Joker.

Batman fights crime, Trump commits them. That's right... even Batman hates him. This is just wonderful and ridiculous at the same time.

You have to give him his due... brilliant... batman. It was awful to watch... Tw@t man more like! Twatman. He's Batshitman! TDS is rampant here.

Jesus, the ineptitude... How pathetic. How 45. Russian spy Trump: The EU has deceived us for many years, we have to teach them with duties. Similarly, the EU is enemy, Putin is friend. Only in relation to whom? :) All according to plan from Kremlin. What a tool, Imao next they will be trying to sue him cause he is potus. Well that's because when you're a #FuckinScumbagpotus people don't want to be associated with you #FuckTrump #FuckTheSexOffendingCriminalPotusTrump.

maybe suicide squad would suit better. It's also Washington DC... Comics. Use Captain Americas theme song? Why this propaganda for Trump? Stealing again?

**hah. HAHABA. Ha ha. Hahahahahahaha!! (In my best Joker laugh). Lol. Ha!**

The Great Pumpkin Just Got BUSTED for #COPYRIGHT Infringement. @realdonaldtrump Should Thank @WarnerBrosEnt for having #trump's Bat Ass Crazy Vid killed. Grifter gonna grift!

Who cares!!!!!!! (Fuk trump!).

# Something on Mars is producing gas usually made by living things on Earth

The New York Times  
01.04.19

Morlocks. Gotta be Morlocks. Spock's coffin?  
Go and check out what is that "thing". Maybe it's a booby trap made by aliens waiting for humans to party. Obviously someone on Mars is eating baked beans.  
Bet mars is like, "gross, who farted?" and looking around the room all innocent-like. Just point to someone and say, "Nice one". Then watch them turn red. Always look for the person leaning.  
Martian flatulence? Who or rather what, farted? THE FARTIANS

Maybe it is red because of many wars fought there for planet dominance and now that it is abandoned, the leftovers are for the human race to pick up. Matt Damon probably left some plants there when he was making that movie. Spoiler: Martians have excellent camouflage. ET had to Fart somewhere !!!  
But, but Matt Damon grew potatoes... the Mars documentary said so! Everybody is trying to grow plants on Mars, but what if is cheaper, easier and more energy efficient to make lab-grown meat? Of course, plant growth on Mars is important but is tedious, work intensive, and we need a lot of space to do this.  
The Green New Deal removed those cows from Mars. Don't tell the Democratic Party or it will be banned or taxed. Don't tell California or they will want to regulate the methane on Mars too no matter if is from a living source...

**Stop speculating and get me to mars. I'll investigate the heck out of that big rock.**

All that Tax payer's money. Saturn's moon Titan has lakes of methane. It is quite common. No life required. Most likely underground volcano activity. Could be. Which would be fascinating.  
Global climate is much more complicated than engaged science thinks.  
You should publish your results then.  
A multitude of red cows would be very nice  
We have cows here – I think I posted a picture of one on one of your tweets!

# A parrot tipped off drug dealers to a raid, now the bird is in custody

The Washington Post  
25.04.19

They arrested the fuckin bird? Jeezus what more do these pigs want? Dude was already in a cage... he DGAF!! Free my guy, he ain't do nothing. At least his commissary won't cost that much.  
This damn parrot should be deported to where it came from but remove all his feathers first!!! My grandma's parrot used to snitch on grandpa when he'd have a shot of whiskey: "Sam's drinking" he'd squawk from his perch.  
Main question – did the bird collude with the Russians and is he going to sing being locked up in a big cage?  
It's interesting that had the animal been a dog that barked, I doubt the police would have taken it in to custody. Dogs don't speak English. Or Spanish! I beg to differ. Ours here in Southern California are bilingual, ignoring unwelcome commands in both English & Spanish!  
Parrot probably doesn't like hairy police alsatians. Do they make handcuffs that small? They provide a lot of crackers in prison. You have the right to remain silent, you have the right to a cracker.  
The bird stayed quiet and didn't snitch in custody. They took him to zoo and he still didn't snitch. They trained him well. well trained. or they got the wrong bird. Parrot's a jailbird now. Unless, because of his age, he's treated as a mynah. Natural evolution in animal criminals. From meth lab to stool pigeon.

**Snitches don't get scritches.**

I hope that @ProBirdRights can pardon him. HALP PREDICENT BIRB! We're with you little homie. Stay Strong. Next year in EPCOT.  
Protective custody or witness protection program? That's cute. Our cops would have just shot it.  
It is too hard now. The game of, "is it real news, fake news, real but just biased news, or The Onion?" Ironic a bird story came out in a tweet. Did he say," ahccaaa crooks on their way, crooks on their way?!"

I can tell by looking at him that this bird ain't a snitch. Stay strong Bird homie.

# New York suburb declares measles emergency, barring unvaccinated children from public

The New York Times  
26.03.19

That's it America! shove universal health care up your arse and see what it does for you when an epidemic breaks out! Capitalism cares not for the sick who cannot pay and disease spares not those who can. You cannot call yourself a developed country without Health care!

I'm all for it. As they should. Correct! As it should be. They ban peanuts from public school because of a few kids, they should do the same with unvaccinated kids. Agree - plus, fine the parents every day their kid(s) are not vaccinated! Money talks when nothing else does. Even better: they ought to shoot them. And their pets and their grand-parents too. (To clarify for the dull-witted: this is a facetious remark)

Science is real.

So is NATURAL HERD IMMUNITY.

Okay buddy.

What about mothers with young babies? To all mothers of young unvaxxed babies: please leave ur baby in the car while u r in the shop getting nappies, Tylenol or formula. Even better: leave them outside in their prams unattended. Can't u see how stupid this imposition is? What is the benefit of being unvaccinated? How folks don't vaccinate is beyond understanding.

WTF does #Vaccines protect against, IF the vaccinated had 2b afraid of UNVACCINATED? Can someone PLEASE explain this for all, HowTF an Unvaccinated be more harmful than the Disease itself or does S#IT Medical Science feels that Vaccines were useless in protecting in first place? It's a concept called herd protection. If a high enough % of the population are vaccinated it stops the mutation and spread effect, limiting the danger to infants and those of low immunity. This is all removed if enough people in the population refuse to get vaccinated.

They may want to, but I hope they realize that's not something they can just do. There are many countries that have laws against leaving children unvaccinated It's way overdue in the US.

Thank you for completely missing my point. I'm all for vaccinating, but in this country you cannot just ban a whole group of people from public places, and I don't care what the others do.

It is if it's in the interest of public safety. I don't see how that has any bearing on it.

What, are the kids going to wear tags? If they are unvaccinated then they should.

Everybody has lost their collective minds. 40000 people a year die in car accidents but we worry about measles, because there is a toxic vaccine that can possibly prevent it. And why? Because we have had over 150 cases in the county. wow. If that is not tyranny then I

quit. Authoritarianism = Liberlism = Fake Science = use children = Kill babies = love illegal aliens to get votes = lies = Fake News = no border = tyranny = liberlism and so on and so forth.

I can't believe mothers with young unvaxxed babies aren't revolting over this. Young mothers, know that you're not allowed out of the house, with ur baby, for a well deserved stroll around the shopping centre or you'll end up in prison! How bloody ridiculous #vaxwoke #vaccines.

Government: due to the high number of unvaccinated cases of measles we are issuing a warning that parents of unvaccinated children should avoid public areas for their child's safety Antivax: how dare you tell me where I can take my child, also I demand you pay for his treatment. I think that's so sweet. The government allowing Parents to spend more time with their unvaccinated children before they die of totally preventable diseases.

Seems like this could possibly backfire, as these kinds of conspiracy theorists need persecution to validate their beliefs. Does that include illegal aliens that have had NO vaccinations?

Measles party baby! Hell yeah. Natural herd immunity.

The chicken pox outbreak? Lo!! Who cares?!!!! Lololol!!!

# Naked Russian man tries to board plane claiming it's more 'aerodynamic'

The Independent  
24.03.19

Well he isn't wrong... mate, it's just Science. Did no one tell him that certain items of anatomy are liable to cause turbulence? Clearly went on the same aerospace course as Trump. Bartender ---- I'll have half a shot of what he had! People really need to stop doing morning shots... By all that's holy, don't go giving Ryanair any ideas! Air travel today is a nightmare. There was a time when one wore tie and suit to fly. Now riff-raffs just wear anything they like. But then, airlines used to serve tea in ceramic cups and supplied steel cutlery.

Fees for extra luggage are seriously getting out of hand if you have resort to this! Looks like Alistair Campbell?...Maybe it is. Wouldn't surprise me. **I mean, he is holding his hand luggage at least...** While your premise is correct I don't think it works like that, fella. Every little helps. Given that there is a time and a place for making such a point, I think that this was an attention-seeking publicity stunt. lol... with nothing to declare :P. Probably

an American. We are so used to government abuse here in the United States that to take our clothes off in the airports for TSA to "screen" us has become the new normal. The airport security systems in the US virtually criminalizes the innocent traveler. Yet the US public seem to be happy with the TSA's militant style of screening - haven't seen a whimper of public protest demanding any better. Nothing to hide as well, but terrorizing the people with his baby look. so its OK for the TSA and USA government to get naked body scans of you for security, but if you disrobe in

front of other passengers, that's a no-no. Strange world. TSA: There is ALWAYS a place to hide things! \*Licks lips\*. he must have had a really bad experience in his last flight so he was prepared this time. the social danger are people neglecting the right to be naked. No humanity there. I will protect his dignity first as he seemed to be cognitively impaired. Freedom for the NUDISTS hahahahahaa. Naked Russian still exercises a more viable theory than Russian Collusion. Legend.

# Want to stop climate change? Time to fall back in love with nuclear energy

TIME Magazine  
11.03.19

Hell no. How about we not flirt with the idea of more Chernobyls or Fukushimas? I'd rather fall in love with a tiny home and a solar panel bigger than the roof... It's truly astonishing that the amount of opposition toward nuclear hasn't changed since the 80's and yet the technologies have changed immensely. Same old arguments... "What about "x" incident?! Nuclear bad, Green cheap!" A shame none of that is an argument that holds weight. Fukushima was less than a decade ago. I'd rather not play with fire, period. Why does the solution have to be something with the potential to be equally devastating to the environment? We need completely green solutions so we don't repeat the past. It's time to find a cleaner, safer, and cheaper alternative. Nuclear energy is safe and clean. Do you know anything about science? Everyone always claims how safe nuclear plants are. Tell that to the many affected generations of radiation, and the permanent damage done already! The fallout of an accident is not worth it. Think before you write. There's no such thing as clean energy. Don't let those energy companies try to convince you otherwise. If only they could find somewhere to dispose of nuclear waste, or recycle it? Am I talking out of my ass? Maybe we can build the reactors somewhere we don't frack, which is where exactly? If we can manage to obtain a sustainable Fusion reaction and get the required amount of energy from it then that will be the clean energy humanity needs. Scientists are working on this right now in several large reactor experiments & it looks promising. You cant say you have a drug for curing, lets say AIDS, if its still being worked on. Inviting this talk now means countries will just go for the tech as it is now. Relax humans! You are soon going to build fully functional Thorium Power Plants. If we can manage to obtain a sustainable Fusion reaction and get the required amount of energy from it then that will be the clean energy humanity needs. It Leaves no choice, only alternative is Atomic Energy. The Ruby Slippers of energy.

# Eggs may not be so good for you after all: new study links with cardiovascular disease and death

The Wall St. Journal  
15.03.19

Sorry?!!! Can't be true. We eat them every single day. Gotta have em. Never thought I'd say this... "Fake News!". Who funded the study? I'm guessing Kelloggs or Monsanto. My 92 year old dad eats at least 2 eggs nearly every day. He doesn't take any meds, either. In five years they'll say, oops, wait, we were wrong. Whatever. Since my long term health is behind me, I'll have another omelet. Gotta die somehow right?

I'm not riding this roller coaster again. There has been so much research done on eating eggs to be a great source of protein, etc., etc., etc. Believe this and the yolks on you.

I'm old enough to remember when eggs weren't good for you Part I. This is what they should do - every leap year define eggs as bad. Other years GOOD! This way we can keep track... We've become so willing to rely upon 'facts' -- which are one of the least permanent things ever conceived. Don't like the new fact? No worries, it will be replaced next year with a new one!

Food Scientists. 100 times less reliable than Climate Scientists. No joke. Eggs, aspirin, and now soda. I don't smoke but I may start just because I will know what is actually is going into my body and what is going to kill me.

My mother a WW2 nurse lived till 94, my grandmother lived till 102 and her two sisters till 104 and 102 all ate eggs every day and none had any health problems with eating eggs.

**Moderation and balance people. Who eats three eggs every day?**

But bacon is still okay, right??

I gave up eggs and cheese! It was incredibly easy...and fab losing weight. No eggs and no cheese? Why live? Hahaha. I stay away from underground vegetables like carrots. Anything above ground is fine. That's what liars in bed with the sugar and processed grain industry do, and have been doing for at least the last half-century. Sounds like inception dude.

Guess what? I am going to eat eggs because they are delicious.

Don't f@4k with eggs. Just don't do it!

# Student strikes spread globally

BBC News  
15.03.19

Good! They're the ones that will have to live with this mess. It's a shame that children have to fight for the future of the world!!! Only goes to show how selfish, we as adults/govts, are!!! Change must come sooner than later!!

Are we still keeping this climate change myth alive? Using children to push an agenda. How progressive. You people do know they will be bored of this in five minutes and move onto something else right? Children are better off seen and not heard. They can barely wipe their own asses. Yep, it's Friday, it's weekend, so why not skip school. I'm going on strike too, I'm going to stop paying the taxes I pay for kids to have an education they don't get. It's too late.

The monstrous scam that is humans caused climate change has long since been exposed. BBC and other media should

be ashamed of using these stupid kids to further their own fantasies. Is this liberals poisoning our children? Bet none of them would give up the internet for a week to save energy, hypocrites all. Poor ignorant children Brainwashed by old fools. Climate liars getting rich, now shutting down our schools. I used to defend conservatives when they stood for less govt and low taxes, but read these comments and you'll see they now stand for ignorance, lies and hate. These kids care about their future and somehow that drives you nuts. Sad.

Yeah I'm sure most of them could defend their position in a debate for oh what 5 seconds? It's virtue signalling from a bunch of kids who wouldn't actually sacrifice anything important to them if asked.

If they hold their breath, it'll decrease carbon dioxide emissions! I wonder if their mums dropped them off and picked them

up in their 4x4 like they do everyday for school. Are these the same kids that don't know what a bin is? Or want the same top washed 3 times a week? Watched four kids exit McDonald's and throw their empty bags and styrene boxes on the floor not 10ft from a bin. I think it's safe to say these aren't the same children. These kids are the most consumer driven generation yet. If they want to show us how to save the world stop wanting so much cheap imported 'stuff'.

Incredibly short-minded and assuming. It's the previous generation's fault for allowing and supporting consumerism. I do not believe that these kids desire free and cheap stuff more than any other generation. Conversely, I believe the previous generation is at fault.

Basically then, we should never have come down from the trees.

**What do you mean by that, "come down from the trees?"**

Ask yourself, are UFOs a threat. There is just as much proof for these as there is climate change. 1200 years wouldn't be enough time to fix it, its all about Quantity. More likely to be invaded by then.

I actually cannot tell if these are trolls or are just legitimately that stupid/ignorant. I'm hoping that all these comments largely represent a loud minority. I was amused that many children, whose parents had got them excused from school to take part in the protest, actually skived off the protest and had fun with friends. Thank God! Normal kids!

LEAVE THE KIDS ALONE.

# MPs voted on eight alternative brexit options and rejected them all

One of Scotland's most protected lochs is at the centre of an environmental protection row after being found to contain microplastics that can harm marine life.

The Washington Post  
07.03.19

BBC Politics  
28.03.19

Umm, pick ones nose, see if there are any fairies at the end of the garden, knit a scarf, go on a day trip to bognor... The silliest, stupidest, most mutton-headed bunch of idiots must be contained in our Parliament. We really ( really ) must find a better system. I have a plan... :) Put @JeremyClarkson in charge for a month #sorted.

I still think locking them all up in a room without food or drink would be the quickest way to get them to reach an agreement. Is that an option?

"No, no, no, no, no, no, no, no, no"... Mamma mia, Mamma mia Mamma mia let me go.... Theresa May has a deal put aside for me.... for me... for MEEEEEEEE !!! (followed by Headbanging)

How about doing what they promised to do? Leave the EU on March 29th. But that would assume they were not totally unprincipled liars. We voted to leave and I for one will never vote again! British politics should be scrapped. The indicative votes are & again Monday what a waste & it gets us nowhere. The people have voted LEAVE - end of - out EU. Sack the lot of them. They are all a disgrace. They debated options for 4 hours. Give them a chance. They have been debating options for weeks on end! They haven't.

**Then what have they been doing, apart from fannying about?**

New referendum! Why would we be surprised that a remain majority group of people (a) vote mostly in favour of a second referendum and (b) can't agree on a way for leaving the EU. Give them a binary choice. Leave with negotiated deal already in place or leave with a No Deal. Largest support wins the day and we can then move on. They have proven they are not capable of leading the country so they should just accept the referendum result and move forward.

3 easy steps for the PM:

1. MV3 - May's deal vs remain in a people's vote. (It will get a majority)
2. Get longer extension from EU.
3. Resign, go on holiday, work on the tan.

"I didn't become a fisherman for people in Europe to tell me what to do."

Fisherman Steve Barratt says Britain needs to "give them the two fingers" and "just walk" on 29th March.

The Independent  
24.02.19

Two fingers is not a good idea, Steve. They buy most of our fish. And surely what you want is British representation on the EU Commission, Councils and in the parliament, so they can argue your case?

Steve can catch them but he'll have to eat them. And what about the convoys of food that the EU told us we'd need to survive after Brexit? The fish might come handy.

They choose their ignorance, select the narrative that feels most comfortable or makes them feel most powerful. That's why we're in this mess - disinformation and 30 years of lies, spin and scapegoating the EU made the turkeys vote for Christmas. Sadly, this guy's both blaming the wrong people and backing the wrong people. Doesn't he realise there'll be more bureaucracy if we Leave the EU, not less. Assuming, of course, that he still wants to sell his fish to EU countries. Tell him from me I shall gladly give up buying fish if we Brexit. Why? Because the likes of him have proved over and over they care not a whit for the rest of us.

There's a lot of this going on. My brother-in-law is a butcher who's too lazy to want to keep proper food hygiene records and thats the main reason he wants to leave the EU. Personally I quite like living in a country where food poisoning is barely an issue.

Yes food hygiene is a scandal in the UK. Even meat hygiene is a total scandal. Disgusting. I'm Italian and I know Italian butchers who work a lot. When I'm arrived in the UK I've remained shocked seeing UK butchers. A horror movie.

Amazing this man's been a fisherman for 40 yrs and he's never taken the time to actually understand how his industry works. Lovely to get a contribution from such a well-informed, knowledgeable diplomatic analyst. There's our next Foreign Secretary... not. And he wouldn't even be the second worst FS May has appointed.

Err... Steve, who do you sell your fish to?

Why give him the airtime C4???? Good spot. @Channel4News this isn't how to show balance... please don't follow BBC's template, you're better than that!

Yeah, @Channel4News don't follow the @BBCNews #FalseEquivalence tactic: "We could of had an economics expert, an industry expert, & a legal expert on to explain this... But in fear of being seen as #bias on #Brexit, here's a racist fishermen who doesn't understand the issue". Has he read the no deal advice for fishing published this week? What a fool. Fastest way to crash UK fishing is no deal. 2 fingers & walking away gives UK NOTHING. Science/security/economy stuffed by attitudes like this. @theresa\_may 2 finger politics is sabotaging UK - Time to grow up.

It is so selfish, just because it suits his small world view , when it could be disastrous for the country

Shellfish man

Summary: Steve wants the whole country to leave the EU without a deal because he can't be arsed to do his paperwork. But he doesn't mind the toffs and twits in the ERG telling him what to do,

or Trump, or Putin? What a wally! Steve, when the oceans are too warm to sustain any fish for you to catch, and it turns out Brexiteers are only concerned with getting their fossil fuel dosh, who will protect you, feed you, and insist your village needs sea defences?

Any chance of an interview with the 25,000 British tourist industry people who are losing their jobs right now because they dont have a work permit after March? Why the extraordinary obsession with Fish?

Fishing employs 14,000 people. Tourism in the EU employs 25,000 Brits, English as a foreign language teaching ( which will be very badly hit ) employs 20,000. Honda full supply chain 15000. The media however have bought UKIP's propaganda totally and just bang on about fish. Fishing is Tiny. Almost insignificant, but politically its held an importance equal to the City of London. It sort of sums up how the whole Brexit debate is not connected to reality at all.

"Just walk". Yeah, like Steve does - on water, lol. Glug, glug, glug .... A good time to give up fish if you ask me. It's full of plastic anyway. And Steve will likely be the first to suffer on a No Deal... No sympathy for backwards thinkers. Only thinking of his own interests. Brexit has brought on so much selfishness from different groups.

As a European migrant I am scared of people like Steve. There is so much hate in his words.

Come to Scotland and we'll look after you.

Someone needs to tell him that most of our fishing licences have been sold to the EU and that he's walking away from 60% of his market

He won't be listening. Almost all NI fishing quotas are in the hands of a couple of "family firms" in which both @NigelDoddsDUP & @DianeDoddsMEP have business interests. And so the corruption goes on & on, round & round ...

Steve doesn't seem to have a care in the world, lucky man. Sod the millions whose lives would be complicated, ruined, or even ended by No Deal. So he voted leave because he doesn't like doing 30 mins of paperwork a day. Does he seriously think the paperwork will go away if we leave?

Sounds like a bright boy.... I wonder if the fish will respect the line? Steve wants to go back to fighting (and losing) Cod Wars with Iceland, all because failed politicians like Nigel Farage couldn't be arsed to turn up to represent him on the European Fishing Committee.

Steve's not quite the Demosthenes the 21st century was hoping for, is he. THE ONLY REASON HE CAN FISH AT ALL IS BECAUSE QUOTAS ALLOW FISH STOCKS TO REGENERATE.

Fishing... the power house of the UK economy. Along with gas lamp lighting and crinoline skirt manufacturing. And tallow. Don't forget the tallow industry (about to go into overdrive when the lights go out).

You can't get thicker than a Ukkip skipper.

# El Paso is tired of the president's lies about crime in their city being used to push for border wall funding.

The Washington Post  
07.03.19

Lying about things is the key reason for trumpys unsavory existence and reputation. Automated lying machine! Of course he came to lie. That's Trump's brand...it's what he does. HE COULDNT TELL THE TRUTH IF HIS LIFE DEPENDED ON IT #TOTAL TRUTH.

I sure wish I could see Donald wearing a cowboy hat... Kick him out! Wall or no wall. Lock him up already.

HASHTAG# here's the crazy thing, Donald Trump goes to a place where the border crime has been the lowest in the United states and tells them that crime was high there before the wall was built and they cheered! They live there and knows that's not true! I live in El Paso i see NO crime!!! Building the Wall be the first. Lol.

Can't ADMIT that the sector of el paso as a port of entry has a form of protection 2 begin with & that UNSECURED areas need 2 b secured? why is that ? because YOU have no problem ? LOL. So confusing... what is truth?

the elite morons of El Paso believe a defined & secured border SOMEHOW IS a personal insult to them. El Paso is a protected entry port UNLIKE other areas that R UNPROTECTED from the criminals. So beyond THE 1s complaining BEING diMs? it has 2B due 2 TRUMP v THEIR FAILED CANDIDATES.

Okay I understand. OK THAT PEOPLE FROM EL PASO, TX. WANT TO LIE ABOUT THE CRIME THAT GOES ON, WELL, THAT IS ON THEM AND THEY BETTER DON'T COMPLAIN WHEN. (hopefully) SOMEONE IN THEIR FAMILY BECOMES A VICTIM OF AN UNDOCUMENTED IMMIGRANT!!!!!!

Wow, you just can't trust anyone these days. So exhausting. Then why aren't they, and other Republicans, DOING SOMETHING about it then? Bunch of spineless weasels, that's why. It doesn't work to lie about the people you're talking to. Why then did you let him come there and have his fib fest.

I thought the border officials in El Paso wanted more walls. You know, the people who actually do the work. Actually, Trump was the only one saying that.

Your publication is so full of crap!!! Fake news!!!

# Ski resorts have been accused of encouraging children to miss school by luring families during term time with a promise to supervise homework

The Times of London  
06.02.19

The earth is flat.

Man goes into abandoned home to smoke cannabis and finds overweight tiger

CBS News  
06.02.19

# This zoo will name a cockroach after your ex, then feed it to a meerkat on Valentine's Day

CBS News  
06.02.19

Ha ha! This is pretty funny! I love it! Right the thing I need!!! God bless America.  
HONEY, it's on!!!! Is there a maximum limit of how many exes we can submit to this? Where do I submit the names?? Should probably offer this deal year round. Now. Now. Now. And every day.  
TBH I find feedeing animals so delightful I wouldn't mind if they ate a roach named after me. Cooooool. don't get any ideas. I harbor no bad feelings toward my exes worth the naming of doomed cockroaches... but I hope the meerkats have fun! <3  
Do we get a bulk discount? Hmmmm  
... I don't have an ex but I DO know a few people than I can volunteer as tribute.... so doing this for my best friend, and her ex is my brother! How passive-aggressive is that? Is it wrong that I love this so much?  
Dammit if I do it on fb people will see. DAGNAMMIT why is fb so ubiquitous. Ruins my evil fun.  
DAMMIT.

## Brb how much per roach?

Wow! What ever happened to forgiveness and moving on? Gonna be some fat-assed meerkats. Someone, please take note! We need a zoo in UK to offer this same (or similar) service using our politicians. (Note: This is not a left or right wing comment, nor pro/anti-Brexit. I want to get the whole bloody lot of them!) I hope they have a good supply of cockroaches!  
Calm down! Hold your horses! Everyone form a line. They cannot possibly run out of roaches - there will be enough everyone! Please have your cash or credit card ready as you approach the reservationist.  
Can we temporarily name the meerkats Mueller? How about soon to be ex-presidents? #Trump. It'd take a lot of really hungry meerkats to eat him. Well, let's get to work then.  
They could bring those things to my house and take them down to the basement and they could have a cockroach buffet. There's a lot to be said for... Just moving on. i feel SO political about this. Thank god all my exes tend to die in horrible accidents.

# "I'd rather not be here."

## Indian man wants to sue parents because he didn't consent to be born

TIME Magazine  
08.02.19

What a time to be alive. Big mood. First in the history of mankind. Lol the millennial struggle. We gotta get our survival money somehow. U see this schlt right?? This generation...boy I tell ya!

Can parents sue their kids if they don't like the kind of adults they turned out to be? Parents counter with, they wanted a girl. Should be a class action suit with 7 billion plaintiffs. That mistake can be rectified rather quickly... Like for real?

Imagine if this becomes a trend... I'm suing whomever birthed Trump. No one asked me!!!! Me too... I didn't ask to be here... I hate life... I should sue my parents too. His mother said if he could come up with a rational explanation as to how they could have sought his consent to be born she would accept her fault. My parents: I brought you into this world, and I can take you out! When you think you have heard it all... time to evacuate Earth. Some of us have lost our damn minds. Stop this insanity and throw this out of court. Maybe he could sue his teachers or sue the store clerk or sue the check out guy at Walmart. He has a better chance suing himself for failing himself.

A third "person" is liable, God, for apportioning identity. Hopefully they'll settle out of court and save us all the agony. Should we file a class action? Cause I didn't agree to this shit either. His attitude is sad. Needs Jesus, hope, and an understanding of the gifts and talents he's been given to serve others.

He should have put that in writing before he was born. I am sure parents were playing sex sex and were not in attention to bring him in the world. Incident happens!! Crazy! Reminds me of another fool who sued the good Lord over some acts omission of commission. Al has come to the same conclusions about humanity, my goodness, we didn't ask to be born.

Amazing. If the courts even entertain this lawsuit we are doomed !!!!! Anyone know a good lawyer? Coward... No proof... of denying one's birth, surely... If we were not meant to be here ... cannot see why we would be... really...& besides, parents do not plan what they get in a child...past the birth...

Same. But my parents are broke, so I'll just let them live with their betrayal. I think people should really consider having kids. Unfortunately none of us have that choice. We just have to be the best Us we can be. He has money his Parents are Lawyers, he is a business man, sounds more like a MH concern, or just an ungrateful bratt. NONE OF Y'ALL HAVE READ THE ACUAL STORY. What an incredible waste of money in a country that bears the infamous label of having people living in abject poverty. If he wants to know why he is alive praps he could be taught to use his obviously wealthy existence for the benefit of others. What is a

sort of man in the 21 century?

I feel like this should be on Dr. Phil. Very well but whom would you ask, seed or egg, until fused even a unit is not formed... Really? In utero or whut?? Wonders will never end? Except if he suffers from some rare or strange chromosomal abnormalities inherited from genes of both parents... as a result of their lackadaisical attitudes! He has a chance! Lolzz

What kind of bull is this!! Life is a gift!! The greatest gift that we could be given on this earth!! This person needs some drastic mental help!! I cherish every moment I am given here!! Thank you to my Mother and Father for this life. I agree ppl should be more mindful of the environment that they bring a new life into. He seems very privileged.

## It's his own fault, why he ran so fast when he still a sperm?

Must be on that Stuff. Drugs during pregnancy. Oh snap, I'm here for it... keep us updated! Looking his 5 minutes of fame and he's got it.... all I ask for is a little accountability... and a lifetime supply of loot!

There are religions that believe, you may consented to birth and may have chosen your parents. How's he going to prove either way? difficult case. Ask him to provide concrete proof that made him feel like not to be born. Maybe just financial issue. Then just give him a job and a home. He may change his mind. HE IS A MAD MAN AND MENTLY SICK.

NO ONE CAN SUE PARENTS FOR CONCENT TO BE BORN.

HE HAS CROSSED ALL LIMITS OF MADNESS.

Have the parents got some weird insurance policy hiding in the closet? Why would you even bother accepting such a challenge. What a waste of money. Pack him up to a different country and give him the money you would have wasted in court. If he believes in karma, then he chose to be here and chose his parents, so he should sue himself.

Think I used this tactic the first time I wanted my parents to buy me a new car... it doesn't work. Awkward, but understandable. For the nine months I carried you, holding you inside me, \$ no charge! For the nights I sat up with you, doctored and cared for you, no \$ charge! For the time and the tears and the cost through the years, no \$ charge! The real cost of my love is, no \$ charge! Ungrateful wretch!

And that's enough twitter for me today.

# Woman arrested after stealing two tortoises from New York pet store

The Independent  
30.01.19

Lmao bad lady. This is turtl-le wrong. Shame it didn't bite her.

Why is this international news? Front page news at the Indi. there must be something they don't want us reading about. Petit crime - compelling video = Indy fodder.

Maybe she wanted to cook soup that is out of this world?

OR she's an anti pet store chick and decided their tanks were entirely far too small for them to have a happy life so wanted to save them from a miserable existence because they'd been there long enough but didn't want to pay into a system that would only replace with more tortoises, could be a positive!

I'm not surprised, the price of them things they can be £400 each same with coi carp. She didn't want to shell out! In a country where many live on handouts she surely put her hand out to get what she wanted. Saddo !!!!!

## The great tortoise heist!

She thought they were crusty meat pies. They obviously slowed down her escape. Did they try to run off with her? Donatello and Leonardo, The Great Escape.

The usual suspect. H'mm. Why TWO though? Id just steal a snake dont want snakey to be defanged. What the shell was she thinking? Did someone rat? Did she plan to flip them? How Pathetic.

Love going into stores and the owner/ worker is looking at me as if I'd steal but in the back of the store Becky and little Skylar are in the back stealing tortoises. The real question is why are none of the tanks secured? I'm not justifying her actions but animals wont get stolen if the enclosures are locked.

Those turtles were not mistreated in any way shape or form! She is a great person and made a bad decision everybody needs to leave her alone and get a life! If this location is anything like the one in Colonie maybe she actually saved the tortoises from being poorly cared for.

And that "tortoise" all a lesson "that Big Budgie" is always watching

Plastic particles were found inside every marine animal surveyed for a recent study.

HuffPost  
31.01.19

# Endangered Hawaiian monk seals face new challenge: eels stuck up their noses

The Guardian  
06.12.18

Maybe it's time. It's difficult for me to feel sorry for anything that lives in Hawai. But ok. #nosejob.  
Is this animal more or less equipped to face this problem than All The Kings Horses were to face theirs? \*Checks date. They were saying this on capital this morning. Ouch.  
Can't imagine how the eel feels about being stuck up there. Now Starbucks needs to ban eels.

Okay, someone at the Guardian is drunk af. Something about this story smells funny. This has tipped me over the edge. Read like an @TheOnion headline. Sad. Next headline will be "Catholic Priest face new challenge: hamster stuck up his buttocks"

### Snort coke, not eels

Not a good look... No kinkshaming pls. Every time I've had an eel up my nose: I've hated it. Same. If you ever think you're having a bad day, at least you don't have an eel stuck up your nose... probably. These youtube challenges are getting out of hand. Soon they'll be freebasing eels.  
"Eels in Seals" sounds like the worse Dr Seuss book ever...

For fucks sake can't someone pull that shit off their noses, it's killing me. I don't have the stomach to look at or read about this. Am I the only one who finds this picture quite distressing?

Eek ! There is a cheeky saying "up your nose with a rubber hose" ! But not an Eel! Why are they removing the eels. They don't know why it's there. For all they know they are harming an endangered species by removing something that is part of a symbiotic relationship

So that's why species are endangered, parasites that rhyme with them. Ohh well, that's natural selection then. The message is never sniff an eel! This is where hands get useful. Sorry seal, evolution fucked you over.  
"Having a rotten fish inside your nose is bound to cause some problems,"

A truth universally acknowledged.

# It's dinnertime in the Amazon. Look at what's on the chef's menu

The New York Times  
04.11.18

# Nicola Sturgeon has accused the Prime Minister of being too "feart" to debate Brexit against her

The Herald Scotland  
28.11.18

Nicola Sturgeon should put one of her Pointy, Tartan Shoes to good effect, next time she meets the semi-charged Maybot. You mean she should shove it in her ugly, moaning, droning, whining mouth and for the benefit of every sensible Scot keep it there?

Convincing case for maintaining the Union in here from Supplicants in Unison. Where wee Nicola can instruct her branch party to vote the plan down! I'm sure the EU will be delighted with this action.

Yeah well look around all the countryside out of the city of Aberdoom to the other nicer areas in the Shire you will find plenty of Unionists as you call them, they are called the Majority.

I don't think so , laddie ! Why is that what do you have in fact to disprove my factual comments? Nothing as usual. Given that i was born in-between Aberdeen and Inverness in a place called Moray that voted 50% Brexit. Bring it on, i am keen to understand and examine your standards in this area.

So what, there were more living up the stairs from me, than there is in the magical Moray ! Oh, and another thing Walker is a Sept of MacMillan, so behave !

Moray is beautiful. I prefer Macallan to MacMillan, mind how ye go.

Yeh Marc, this would be a really great time to break a 300 year old Union that provides us with our major market; go through a messy divorce

process to coincide with Brexit; start all over again with a split new currency and no lender of last resort; then apply to join the EU. Like, way to go, Maro! Great idea. You should be in charge of strategy for the SNP..... heh, hold on, maybe you already are!!

Joe, your insightful, intelligent, informed political commentary is most welcomed. Typical unionist comment in fact

Today has become a British Nationalist Frothfest ! What's caused this.....LOL!! Looks like the Scot Nats that are frothing more to me.

Why would Theresa May want to meet Sturgeon, unless to ask her where the cloakroom is? May is totally keeching herself at the thought of facing Sturgeon. All she can do us hide, knowing Sturgeon would expose the shambles and total mess May has made of Brexit. It is true though, isn't it. When was the last time May faced a crowd that did not comprise of Tory supporters and activists?

Why would Theresa May wish to share a stage with a nationalist? Is that not the reason recently used by Sturgeon when she bottled out of meeting the fellow economic nationalist Steve Bannon?

Brit Nat May doesn't wish to share a stage with the FM. Obviously the FM is making an exception with May. She normally does not enjoy being on a stage with extremists.

What, Theresa May, the Remain voter, has joined the BNP, Finn? I must have missed that development.

Sturgeon is the fake news specialist, Alistair, and a very feart one at that when bottling it to call another referendum.

Please detail John – in what way is Ms Sturgeon a 'fake news specialist'? As for bottling another referendum – supposing Mrs May called another referendum, would you thank her for doing that in the run-up to Christmas and New Year?

**A debate between May and Corbyn is just deciding which cheek of the same Brexit erse looks better.**

We're talking about Brexit. Why do unionists keep harping on about Scottish independence?

Scottish independence good, UK independence bad. I really see the only reason for all the shouting by the FM is because she is failing at her day job. Just when I thought Sturgeon couldn't get any more embarrassing. Could the SNP please grow up a bit.

Corbyn has spent his entire life opposing the EU. Mrs May, on the other hand, is a genuine Remainer.

Aye, it shows.

Sturgeon embarrasses me. So you are wrong.

Gandhi would embarrass you. Goebels ? Not so much !

You dont speak for me. You dont know me.

# Sen. Warren took DNA test to restore trust in government

Fox News  
28.10.18

Who cares. I'm a cross between a green tree frog and a Cuban lizard. Now that's something to talk about.

Uh, mission failed. Imao , No we know she lied ! 2 for 2. She failed both the DNA and the trust tests.

Lying about what? She repeated family stories that were told to her. It shouldn't matter. Think about it Obama wasn't born in Hawaii nor in the U.S. yet @BarackObama not only smacked critics with his official birth certificate in Hawaii and Osama Bin Ladin's head. Don't feed into childish accusations continue your work.

She never claimed to be a "member" of that tribe. Only that she'd had a family member, way back, who was part Indian. But racist Trump decides, with zero proof, she's lying, creates an offensive-to-indians nickname. So she proved her story was true. Why did Trump care so much?

Nice spin job!! U are the what's wrong w government!! Thank you @nbcnews and @SenWarren for reaffirming our complete mistrust in leftist government and media propaganda. Well done! She's succeeded in being transparent. We can see right through her. I like her transparency so much i wish she'd just disappear.....!!

10 generations back?... In other words NOTHING!!!! She too in love with herself. Did the DNA test tell her she is part Donkey?

Yes, you're proud, but it's 300 yrs later, and I know you don't want to be identified as black. It's sort of band wagoning, bc native Americans had no voice for such a long time as had blacks, with no voice. But now it's popular, and all is forgiven. Headband of lies far exceed one feather of trust.

Trying to smoke a "Peace Pipe", but doesn't how it works. We needed a big laugh, and Liz you are a funny person. Sen. Warren also comes from the state that believed the Kennedy's walked on water also. Enough said. You said that already, like 20mins ago. Does it REALLY MATTER!?

Democrats will still back her. They backed Ted Kennedy and he killed a woman. Hillary Clinton's list of crimes is long. Warren's offense is easily swept under the rug. Senator Warren is awesome!

# Why global demand for soybeans is 'destroying Brazil's Cerrado savanna'

The New York Times  
04.11.18

Yeah. Soybeans. That feed livestock, mostly. Feeding a few billion humans' needs is a lot easier than feeding a few billion animals to feed humans. Animal agriculture is ruining this planet.

Now Bolsonaro will be running things. Because of the current Brazilian socialist policies that were implemented in the last 16 years, that's why. and UK is partially to blame.

Monsanto & other big business is what's killing our bio diversity, blaming consumers for big business greed and lazy choices, making us & this planet pay for their sins. So it isn't just about what we eat but also the farming practices of Big Agriculture. Stop governments arming governments causing mass migration & devastation, why in the 21st century are any more weapons being built... rhetorical... cuz it makes money ... at the expense of every thing on this planet. Ridiculous. With our newly elected president trying to unite to different ministries.

## It's because of all the soyboys

Is anyone willing to pay us just to watch the trees grow? If not, get out the way and let us feed a huge part of the world. I remember ads on tv 20 years ago saying by 2010 the rain forest would be gone, so much for that. But soybeans are good aren't they as they feed Vegans?

Lol most of corn and soybeans are fed to livestock. Another reason to stop eating animals. Where do you think all that #Animalagriculture feed comes from? #govegan #timetochange #Cowspiracy.

Soy consumption inevitably wrecks the metabolic system in addition to the havoc caused to the thyroid. It's not either rainforest or soybeans. Why not grow them in mixed-fruit cultivation, sustainable?

Farming was always "meant" to be sustainable. Earth giveth, Earth taketh away. Recycle soil, compost, re-plant... but if farmers struggle to make ends meet, hard to do.

Indifference , cruelty , lack of mercy are prevailing?!  
Not Appreciating.

**Big Ben runs London Marathon...but has a bit of trouble getting over the finish line**

The Independent  
28.04.19

Alexa, show me a visual metaphor for brexit.
