

We're proud to present you **Pakiet** - our first project made in wood! **Pakiet** modules are made of genuine raw materials, like spruce plywood and raw steel. The main advantage of using plywood is the ability to minimise the cost of production to its maximum, as well as maximise its outreach to a mass audience. **Pakiet** will prove itself ideal in student spaces, the homes of young families, or small start-ups. Thanks to its modular composition, as well as easy transportation and storage, it is equally suitable for pop-up bars and restaurants. The client becomes the final link in the design chain, and without the use of any additional tools, is able to create a perfectly functioning, full dimensional piece of furniture. Natural plywood equally enables product personalisation – we are able to paint it and decorate it to our personal wishes.

Inspiring  
by nature

# Story

Few years ago we were looking for the most smart and sustainable way to transport our products to our clients. This way we came up with the idea to create a furniture system based on minimal number of components. In a result we have brought a Pakiet to life - radical in its simplicity, strong by its pure naturalness.

Pakiet is not only a furniture collection. First and foremost it is a system carefully developed in order to satisfy user's needs. While designing the Pakiet we focused on very inch of a product, so it can be easily packed and transported efficiently. Pakiet is made of natural, pure plywood. You can give it a more personal touch adjusting it to your unique taste and style. We're giving you an opportunity to get closer to your surrounding and build stronger connection with it!

Pakiet loves transforming itself, from flat pieces to three- dimensional objects fitting perfectly into new spaces. This makes it an ideal solution for nomads - always on the go, constantly changing the surrounding.

When living in a city, a nature can seem very distant. We bring it closer to you.

The collection impresses with a smart and unconventional solution, and carefully elaborated details make it beautiful and unique.

While living in the city nature can seem very distant. Pakiet system gives an opportunity to get it closer to you with its raw materials. The collection impresses with a smart, simple as well as unconventional joining solution with it's carefully elaborated details - they are unique and beautiful.

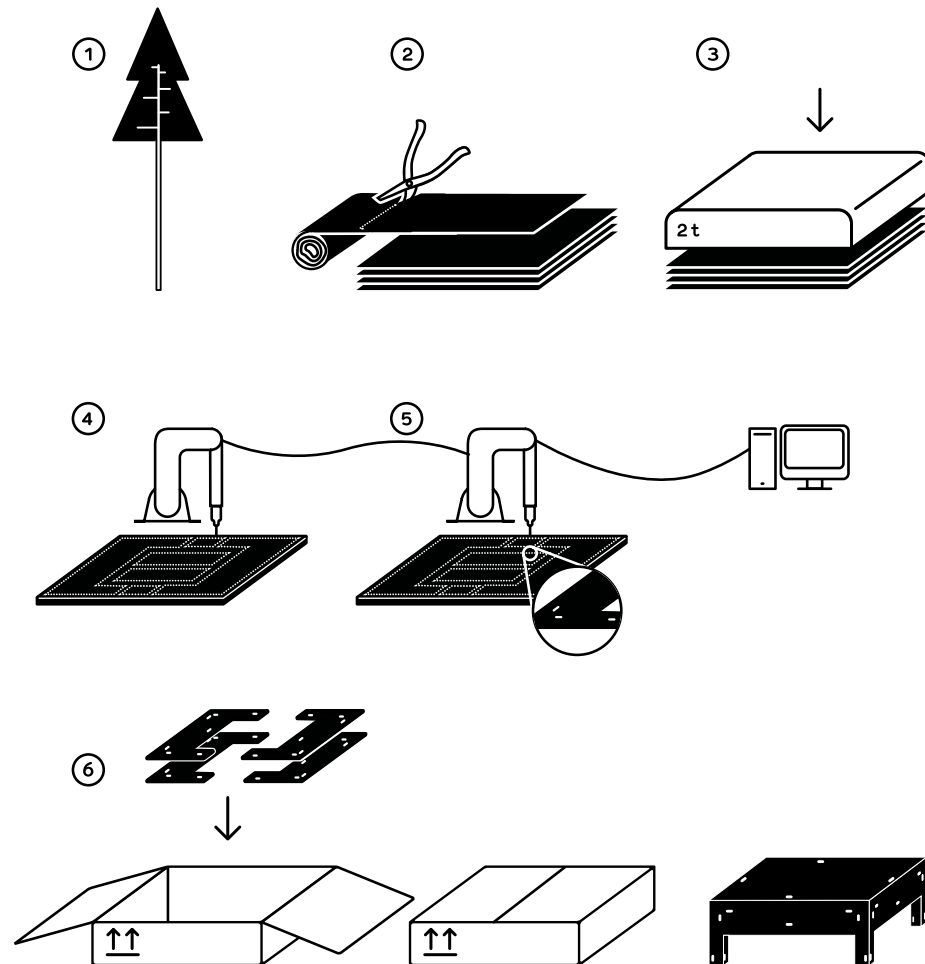

The Pakiet is not only a furniture, but first and foremost, it is a system that has been developed in order to best fit the user's needs. Designing Pakiet, we pay close attention to every centimeter, so that it can be easily packed and transported. Because it is made of natural plywood we give you the opportunity to create your own furniture. You can give it a more personal touch and change it in any way. The fact that we can easily disassemble makes this product ideal for nomads. It can travel with us, thus perfectly find in new places and giving them a friendly and domestic character.

# Technology.

## We are process designers

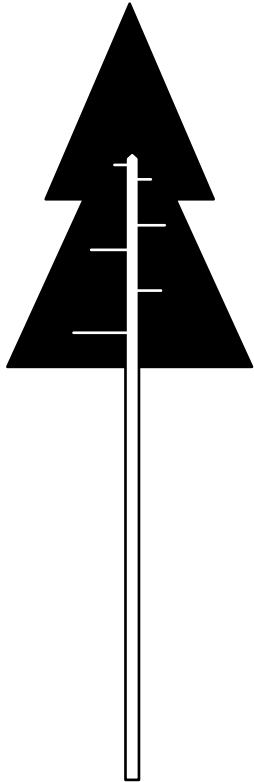

Principles of every well-designed product is a functionality, a simplicity and a natural beauty. And we give you all of this in the Pakiet. We like to be surrounded with natural and beautiful things. It becomes the main idea to create this shelving system. Raw plywood is a durable and a natural material, which makes our furniture robust, durable and at the same time environment-friendly. We use natural materials because they also engage our senses.

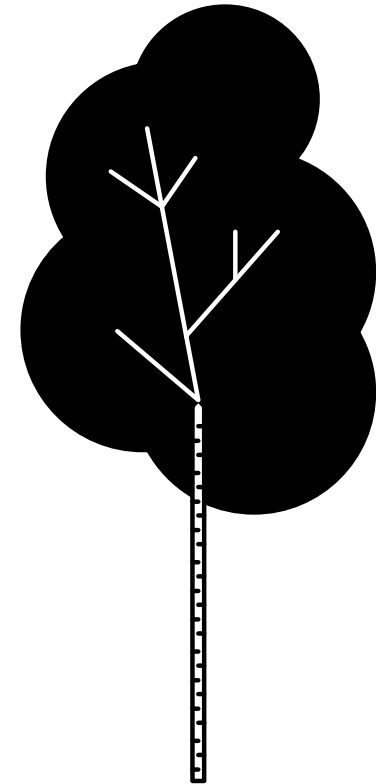

All fasteners have been replaced by special steel clips. Clips merge the entire structure in a one solid block. With this solution assembly becomes child's play. All of this makes the Pakiet an unique piece of furniture. While designing the Pakiet, we are paying a close attention to the smallest detail, so that it is light and easy to transport. Furniture is packed in a flat pack which saves space during transportation. At every step of designing we consider what's good for the planet. Therefore the materials used are suitable for recycling. We also generate minimal amounts of waste products, which are easily processed and ready for reuse. The beauty comes out from its nature. Details creates its uniqueness.

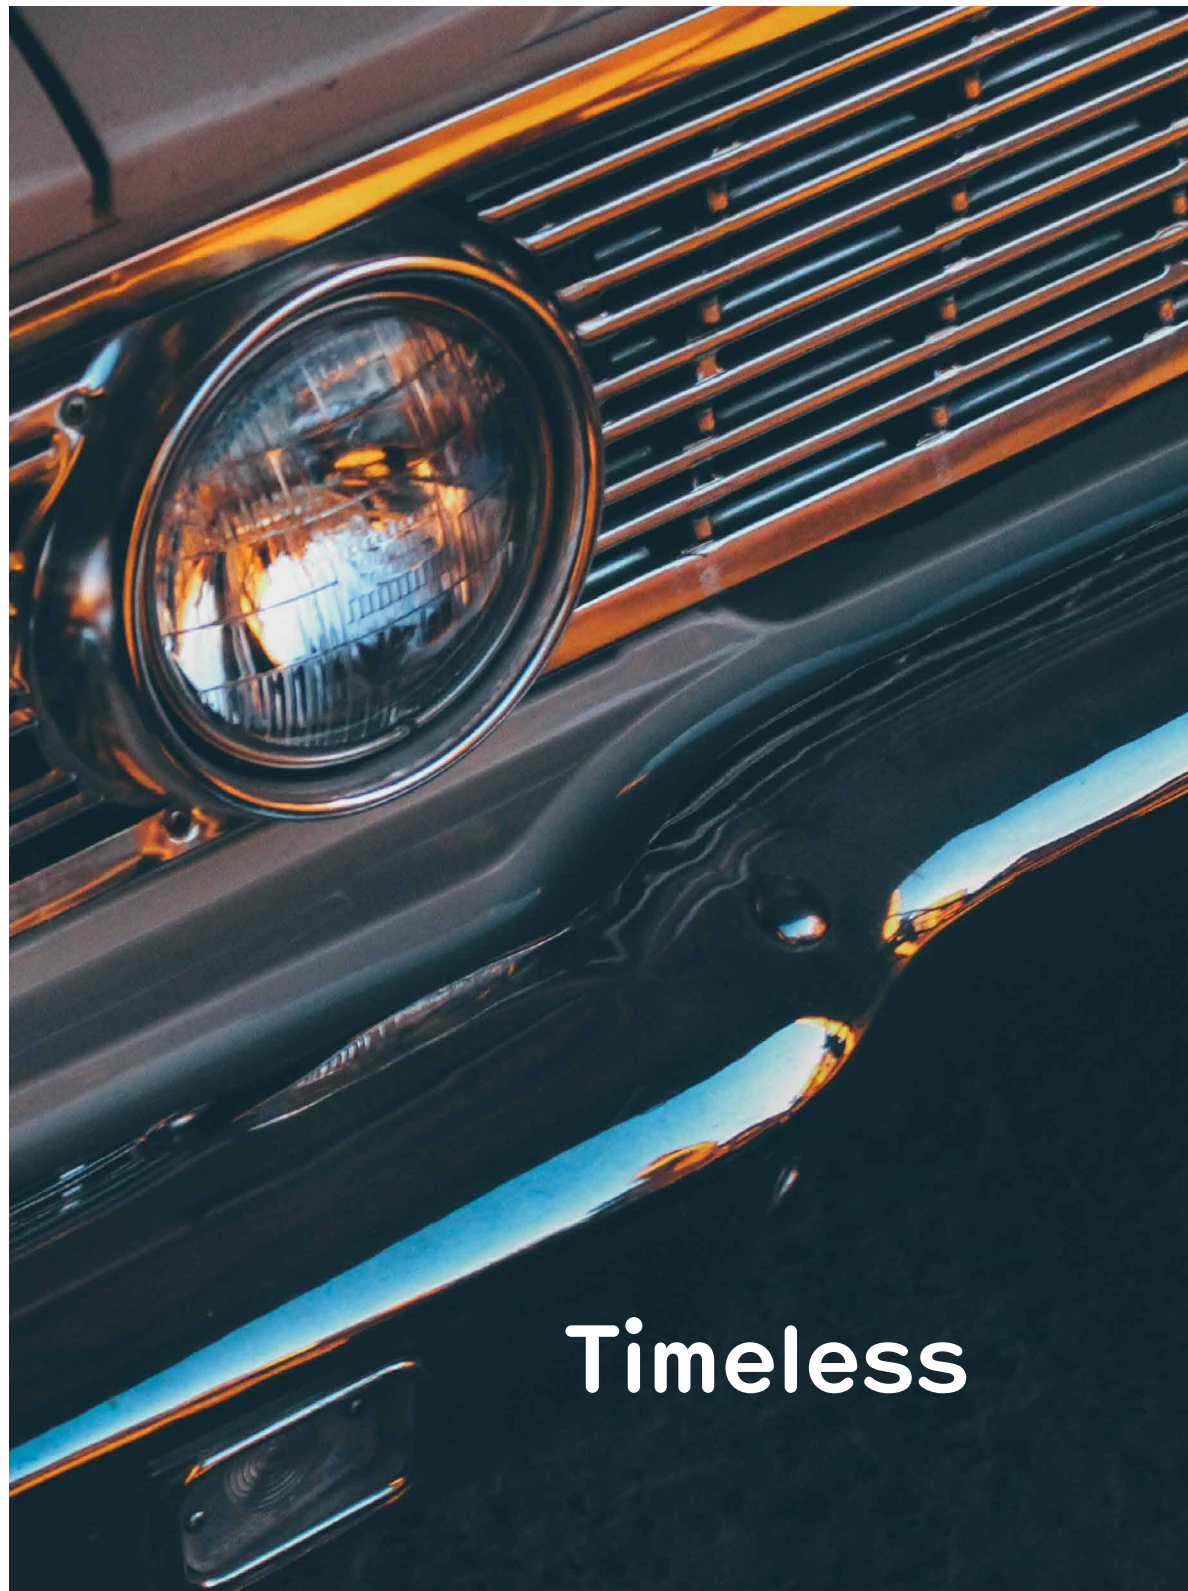

Spruce

## Birch-tree

Timeless

Home.  
A touch of nature  
in your space.

## Home

The Pakiet perfectly fits into one's expectations, by introducing pleasant and home atmosphere. It has no sharp corners and edges what makes it friendly and safe for both adults and children. It is functional regardless of arrangement.

Space includes:

**Table M**  
H: 74cm / 29.1"  
W: 140cm / 55.1"  
D: 80cm / 31.4"

**Bench S**  
H: 45cm / 17.7"  
W: 60cm / 23.6"  
D: 40cm / 15.7"

**Office.  
Discover the full  
potential of the  
Pakiet system.**

## Small Office

We know how important it is to maximize it's use and to create a comfortable place to work regardless of type of a space. We created a system with many facilities to guarantee the highest quality of use. With them the same workplace will be more convenient and friendly.

Space includes:

**Trolley box**  
H: 74cm / 29.1"  
W: 30cm / 11.8"  
D: 40cm / 15.7"

**Table S**  
H: 74cm / 29.1"  
W: 90cm / 35.4"  
D: 90cm / 35.4"

**Table M**  
H: 74cm / 29.1"  
W: 140cm / 55.1"  
D: 80cm / 31.4"

## Office

With Pakiet - an office will receive a personal touch and still remaining highly functional. By choosing our modular system you will get a lot of possibilities for changes in the arrangement in your office.

Space includes:

**Trolley box**  
H: 74cm / 29.1"  
W: 30cm / 11.8"  
D: 40cm / 15.7"

Unique in  
every detail

**Exhibitions.  
System which doesn't  
limit your imagination.**

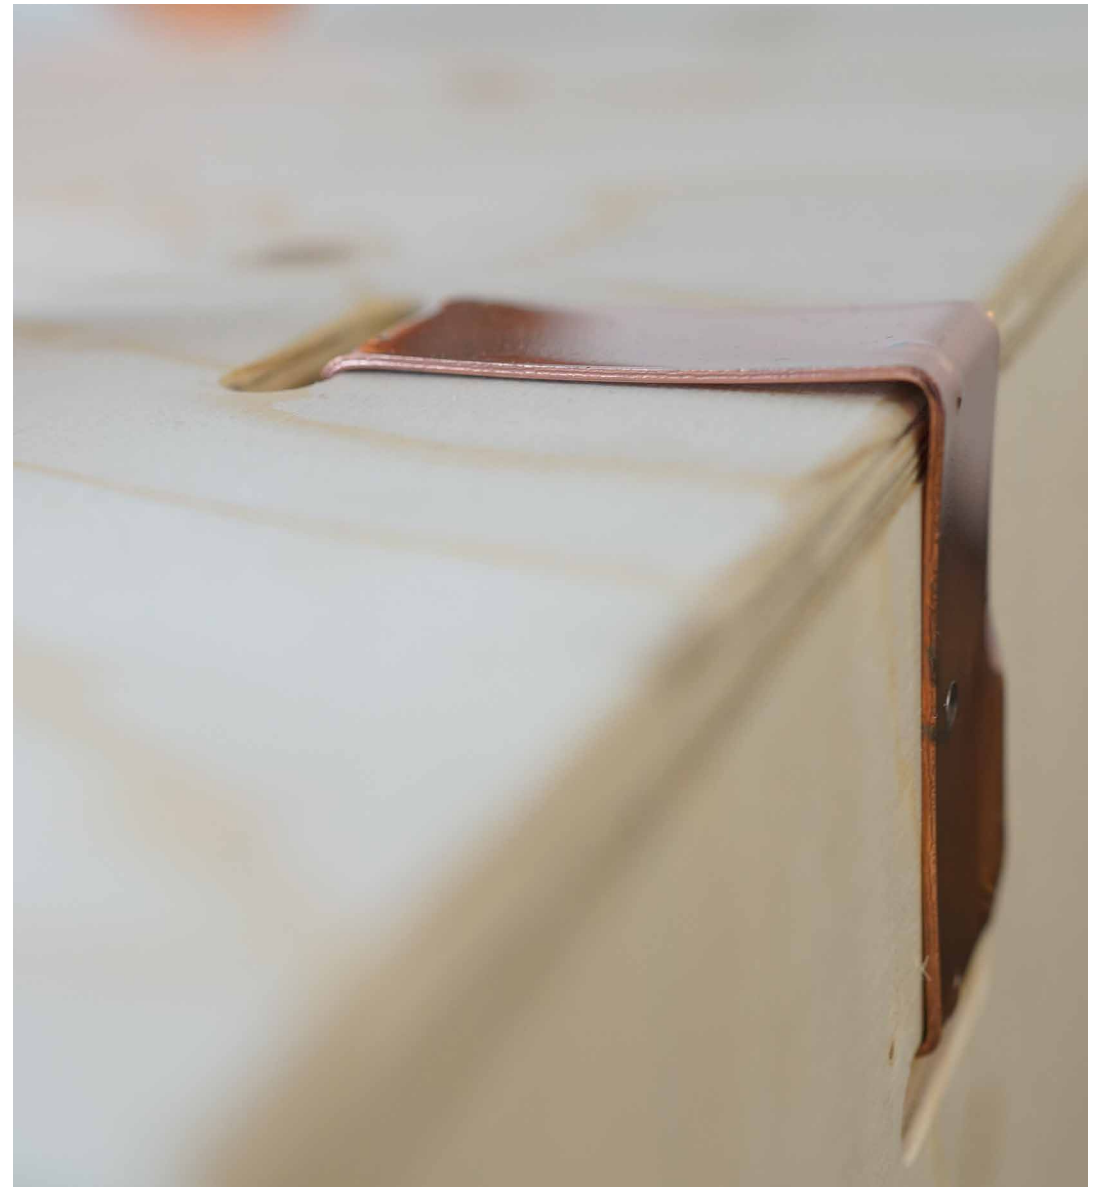

The Pakiet also works well in all exhibition spaces, thus highlighting the importance of exhibited products. Thanks to its simple form, the Pakiet does not compete with them, and perfectly complements the whole composition.

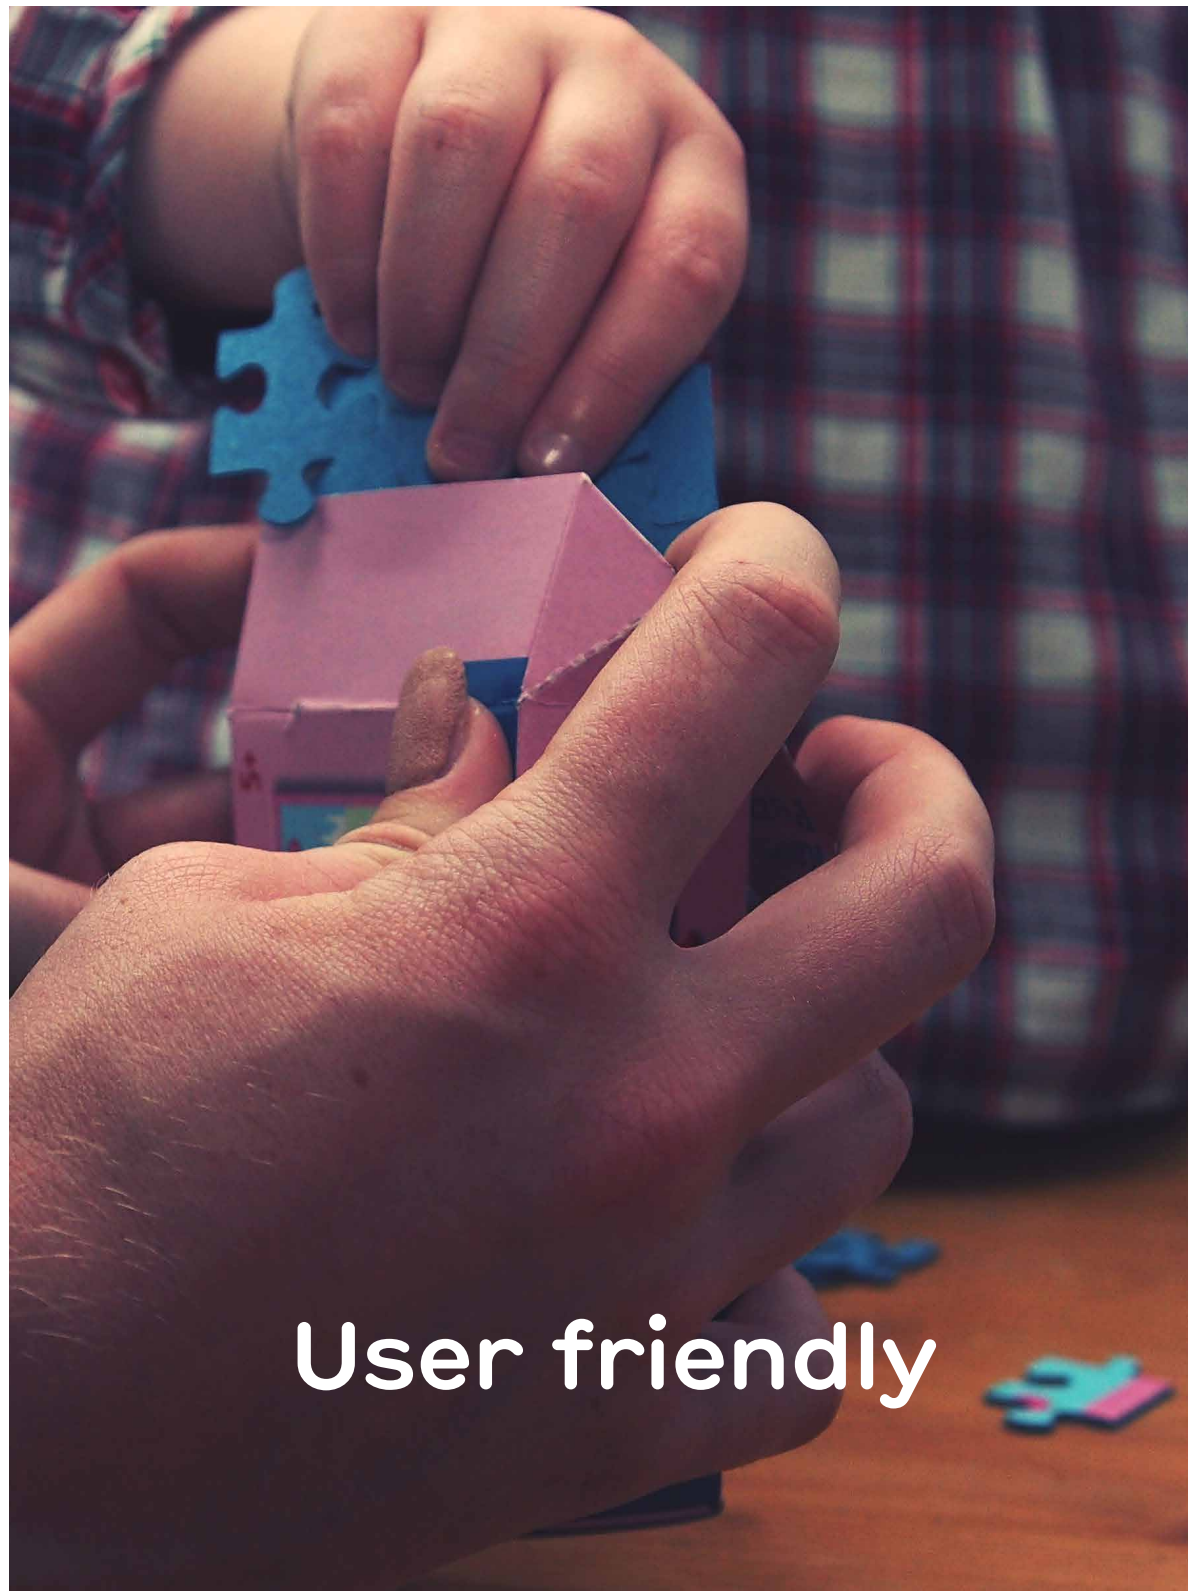

Exhibitions Design London Festival

Metal clips are also available in more sophisticated copper version. This way each product can be unique and represent our current needs and style.

User friendly

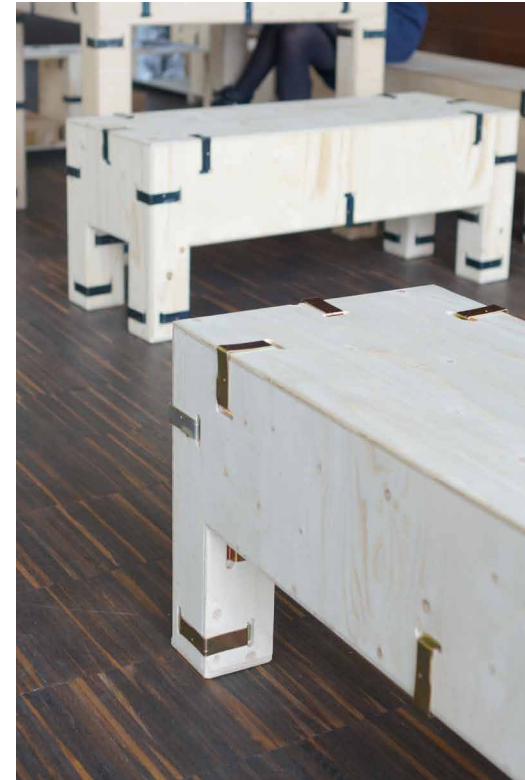

**Products.**  
**Puzzles in the hand**  
**of your imagination.**

# Bench

The Bench will fit to any space and function you want, thanks to an unique and simple form of our seatings. They can be used as benches, display systems or storage. Everyone is able to give each product a new context or function - it depends only on you!

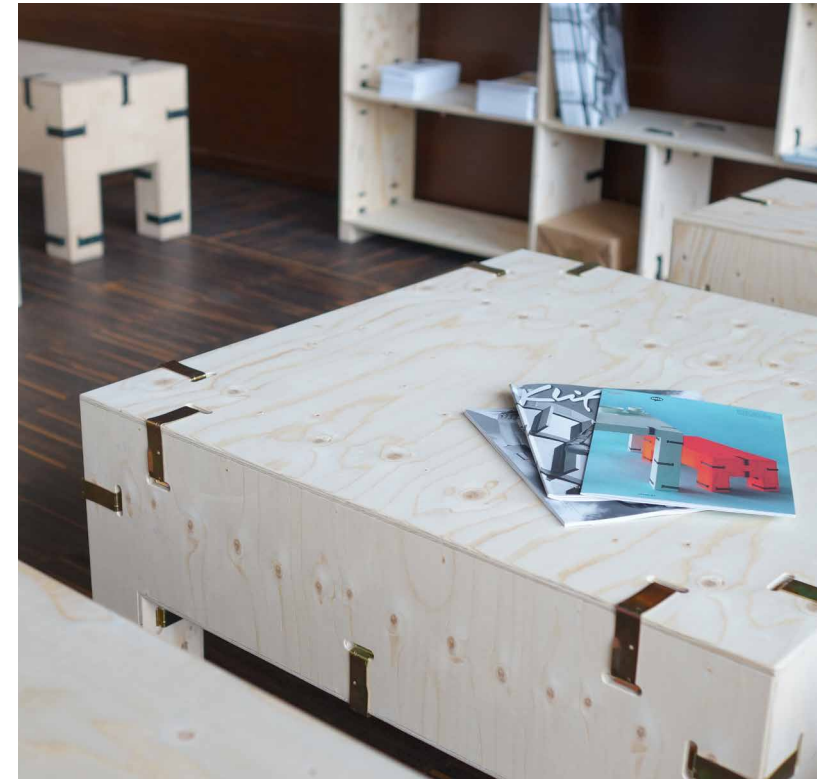

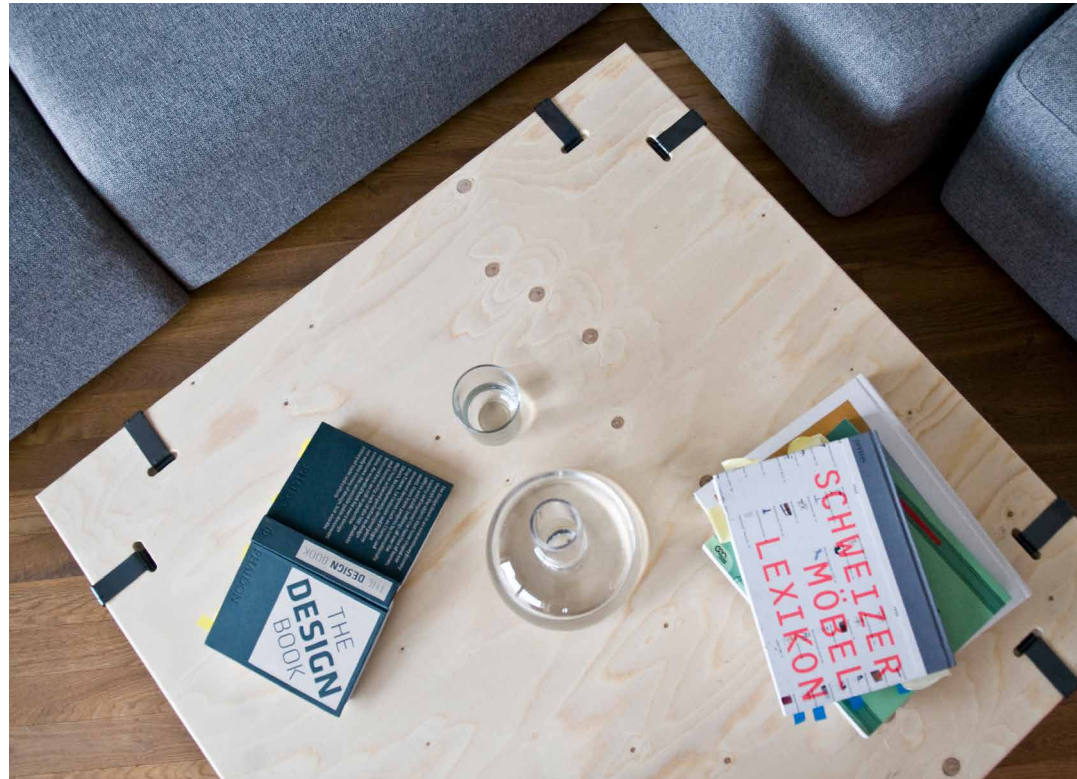

We can get a completely new piece of furniture, by removing the top of the Bench. We transform seating to the new object with storage function that is ideally suited to the exhibition spaces, shops and homes.

# Table

Table is a perfect base for creating a functional workplace, a conference or a dining room. They are multi-functional so you can use them in any space you want. A height-adjustable tables will help you create a comfortable place. Everything to satisfy personal needs and accommodating products to new situations and tasks.

**Shelving system.  
Modular system gives  
us vast variety of  
possibilities.**

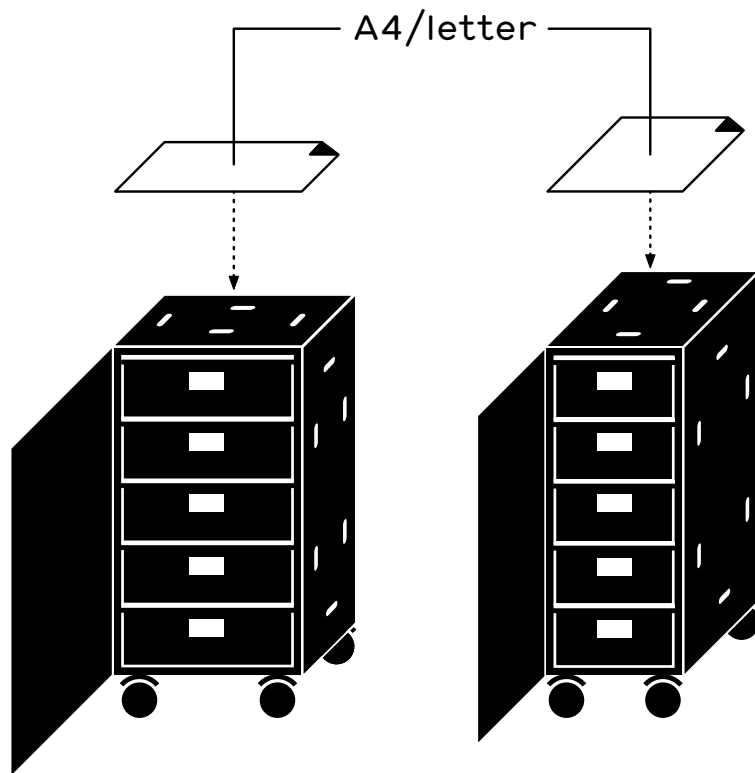

The modular system gives us unlimited possibilities of composing and creating unusual shelving arrangements. You can create your own composition or select one of ours. Our shelving system is flexible - you can easily add new items or change the setting. We have designed them to adjust to those needs, anywhere in home or office.

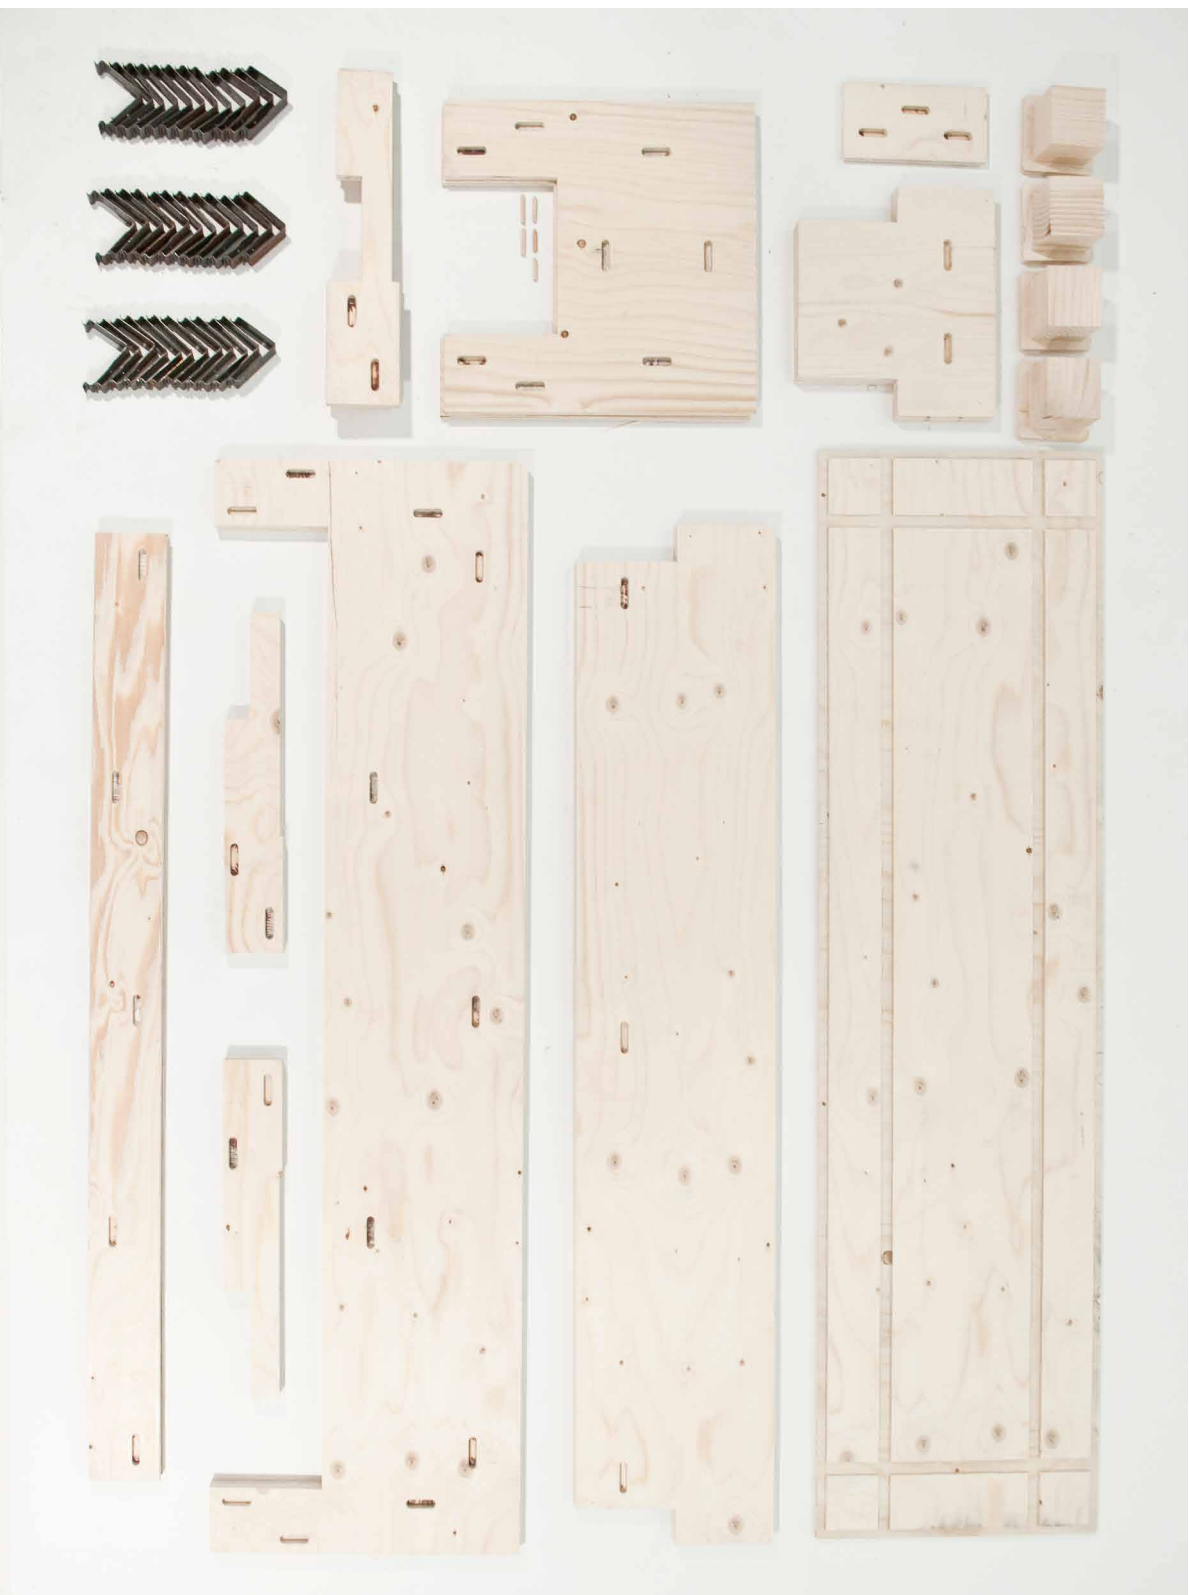

# Trolley box

Trolley was designed for storing the most necessary tools to work. You can add wheels and easily move it to any place you want. You get extra space to work, which is always close to you. Trolley allows for greater flexibility in creating space. It is ideal for storing documents and also hiding the computer.

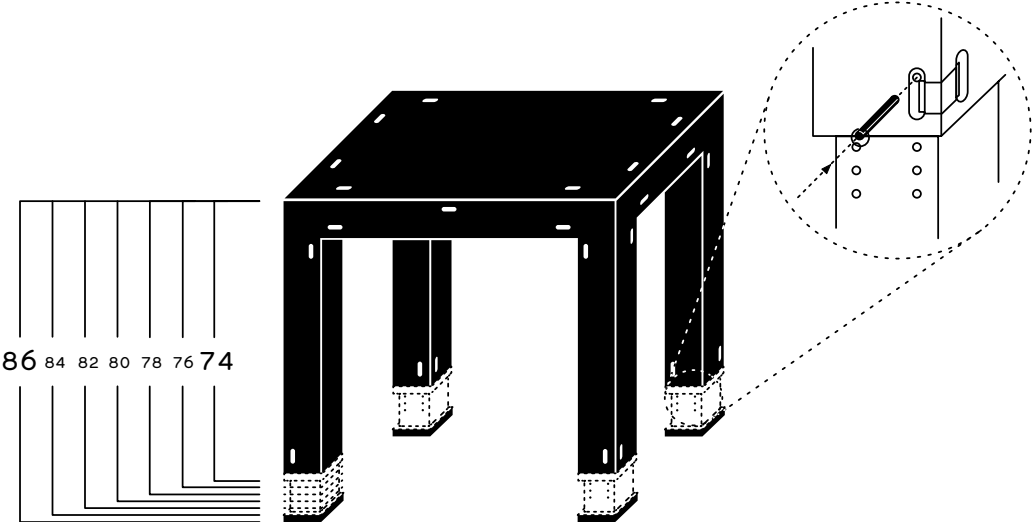

Extremely simple

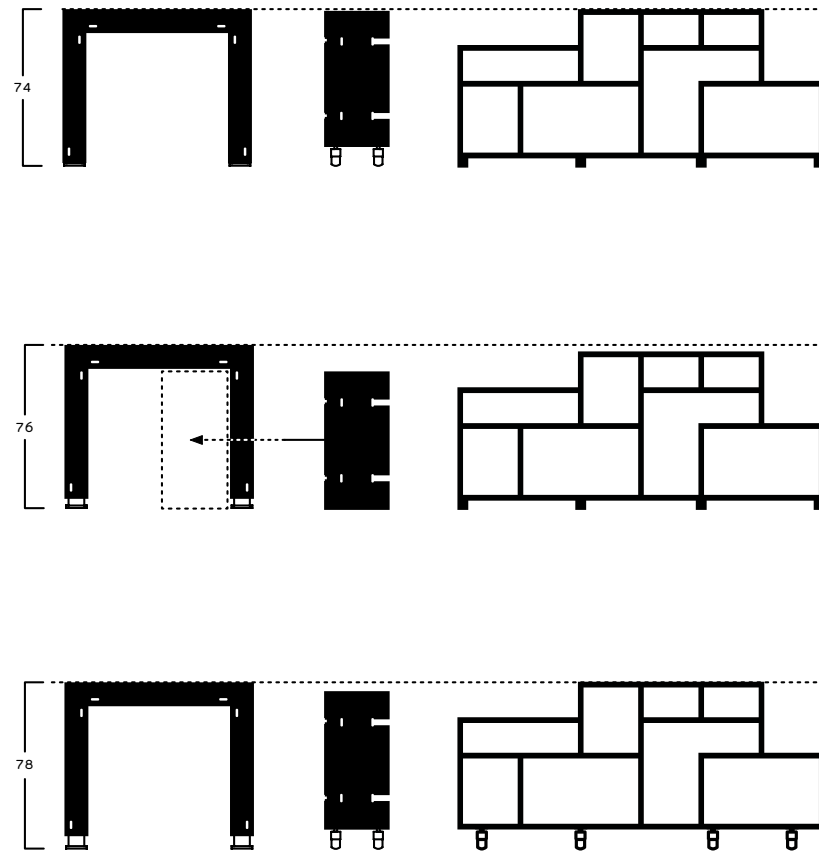

# Applications. The best fit to your needs

Pakiet is not only a furniture, but first and foremost, it is a system that has been developed in order to best fit the user's needs. Designing Pakiet, we pay close attention to every detail in our collection. We offer number of applications that greatly improve the comfort of using of our products. They allow you to adapt Pakiet to your current and specific needs.

We created the system with many facilities to make the same furnitures more adaptive. You can customize the table height to your needs with specially designed footer. The same workplace will be more convenient and friendly. Table grows with you and your needs!

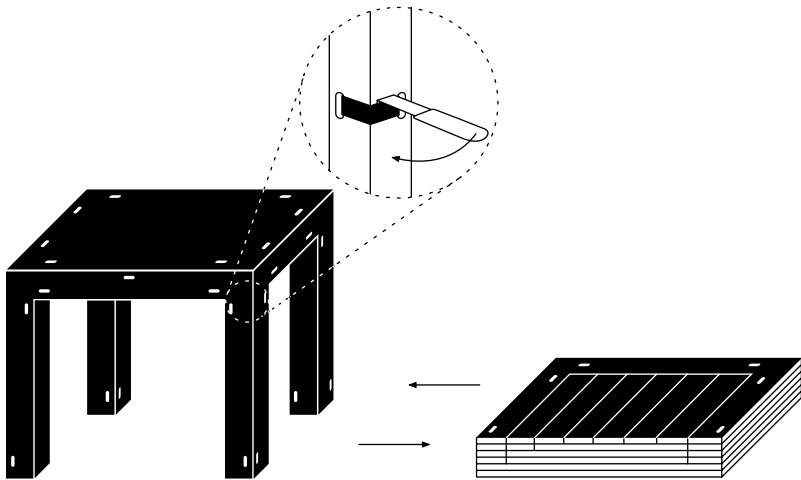

You can add wheels to tables or benches and easily move them to any place you want. Stationary objects become mobile - you decide how to create your own place. It allows for greater flexibility in creating space.

# Assembling is like child's play

All fasteners have been replaced by special steel clips. Clips merge the entire structure in one solid block.  
It can be easily disassembled into flat elements. Pakiet can travel with us so it is the ideal product for nomads.

**Painted and  
customized.  
Give it a more  
personal touch.**

Benches are very capacious so you can put almost everything in them. Storage has never been so easy. They can be used as a great place for catalogs, or books in your office or the necessary space for toys in child's room.

Because it is made of natural plywood we give you the opportunity to create your own furniture. You can give it a more personal touch and change it in any way. It can be easily painted and decorated therefore you can give it an individual, unique character.

With our furniture you can tame and organize countless meters of cables that tangled around each desk, therefore you will gain a comfortable place to work.
